COMMUNICATIONS

1 **Role of Ethylene Metabolism in *Amaranthus retroflexus*—**Ilay Raskin* and Elmo M. Beyer, Jr.

6 **Evidence for the Uptake of Sucrose Intact into Sugarcane Internodes—**Sarah E. Lingle

9 **Isolation of Fixed and Viable Eggs, Central Cells, and Embryo Sacs from Ovules of *Plumbago zeylanica*—**Bing-Quan Huang and Scott D. Russell*

13 **An Assessment of the Rubisco Inhibitor. 2-Carboxyarabinitol-1-Phosphate and D-Hamamelonic Acid 2[1]-Phosphate Are Identical Compounds—**Erwin Beck*, Renate Scheibe, and Josef Reiner

17 **Immunocytolocalization of Polygalacturonase in Ripening Tomato Fruit—**Denise M. Tieman and Avtar K. Handa*

21 **Effect of 2,5-Norbornadiene upon Ethylene Biosynthesis in Midclimacteric Carnation Flowers—**Galen Peiser

25 **Effects of Singlet Oxygen Quenchers and pH on the Bacterially Induced Hypersensitive Reaction in Tobacco Suspension Cell Cultures—**Janet L. Salzwedel, Margaret E. Daub*, and Jeng-sheng Huang

29 **Differences in the Anaerobic Lactate-Succinate Production and in the Changes of Cell Sap pH for Plants with High and Low Resistance to Anoxia—**Faustino Menegus*, Liliana Cattaruzza, Alberto Chersi, and Giovanni Fronza

33 **Cyanogenesis Inhibits Active Defense Reactions in Plants—**Reinhard Lieberei*, Böle Biehl, Anette Giesemann, and Nilton T V. Junqueira

37 **DNA Methylation and Embryogenic Competence in Leaves and Callus of Napiergrass (*Pennisetum purpureum* Schum.)—**Fionnuala M. Morrish and Indra K. Vasil*

41 **A Cerulenin Insensitive Short Chain 3-Ketoacyl-Acyl Carrier Protein Synthase in *Spinacia oleracea* Leaves—**Jan G. Jaworski*, Richard C. Clough, and Susan R. Barnum

45 **Identification of Gibberellins A_1, A_3, and Iso-A_3 in Cultures of *Azospirillum lipoferum*—**Rubén Bottini, Mônica Fulchieri, David Pearce, and Richard P. Pharis*

48 **Effect of Castanospermine and Related Polyhydroxyalkaloids on Purified Myrosinase from *Lepidium sativum* Seedlings—**Paul L. Durham and Jonathan E. Poulton*

ARTICLES

53 **Effects of NaCl on Metabolic Heat Evolution Rates by Barley Roots—**Richard S. Criddle, Lee D. Hansen, R. William Breidenbach, Michael R. Ward, and Ray C. Huffaker*

59 **Tetrazolium Reduction by Guard Cells in Abaxial Epidermis of *Vicia faba*: Blue Light Stimulation of a Plasmalemma Redox System—**T. Vani and A. S. Raghavendra*

63 **Translational Regulation of the Synthesis of *Euglena* Fumarase by Light and Ethanol—**Arnon Rikin and Steven D. Schwartzbach*

70 **Chloride Inhibition of Spinach Nitrate Reductase—**Michael J. Barber*, Brian A. Notton, Christopher J. Kay, and Larry P. Solomonson

75 **Immunological Comparison of the Starch Branching Enzymes from Potato Tubers and Maize Kernels—**Greetje H. Vos-Scheperkeuter*, Janny G. de Wit, Anne S. Ponstein, Will J. Feenstra, and Bernard Witholt

85 **Whole Plant and Leaf Steady State Gas Exchange during Ethylene Exposure in *Xanthium strumarium* L.—**Lorna Woodrow, Jirong Jiao, M. James Tsujita, and Bernard Grodzinski*

91 **Soluble Sugars as the Carbohydrate Reserve for CAM in Pineapple Leaves. Implications for the Role of Pyrophosphate:6-Phosphofructokinase in Glycolysis—**Nancy Wieland Carnal* and Clanton C. Black

101 **UDP-Glucose: (1,3)-β-Glucan Synthase from *Daucus carota* L. Characterization, Photoaffinity, Labeling, and Solubilization—**Stephen G. Lawson, Theresa L. Mason, Robert D. Sabin, Margaret E. Sloan, Richard R. Drake, Boyd E. Haley, and Bruce P. Wasserman*

109 **Rapid Stimulation of an Oxidative Burst during Elicitation of Cultured Plant Cells. Role in Defense and Signal Transduction—**Izydor Apostol, Peter F. Heinstein, and Philip S. Low*

117 **Properties of a Chloroplast Enzyme that Cleaves the Chlorophyll *a*/*b* Binding Protein Precursor. Optimization of an Organelle-Free Reaction—**Mark S. Abad, Steven E. Clark, and Gayle K. Lamppa*

125 **Metabolism of Fatty Acid Hydroperoxides by *Chlorella pyrenoidosa*—**Brady A. Vick* and Don C. Zimmerman

133 **Fusicoccin Binding to Its Plasma Membrane Receptor and the Activation of the Plasma Membrane H^+-ATPase. I. Characteristics and Intracellular Localization of the Fusicoccin Receptor in Microsomes from Radish Seedlings—**Maria Ida De Michelis, Maria Chiara Pugliarello, and Franca Rasi-Caldogno*

140 **Heat Shock Protein Synthesis and Thermal Tolerance in Wheat—**M. Krishnan, Henry T. Nguyen*, and John J. Burke

146 **Mutation of a Locus of *Arabidopsis thaliana* Confers Resistance to the Herbicide Isoxaben—**Dale R. Heim, Jean L. Roberts, Philip D. Pike, and Ignacio

* Author to whom correspondence should be addressed.

M. Larrinua*

151 **Iron-Stress Induced Redox Activity in Tomato (*Lycopersicum esculentum* Mill.) Is Localized on the Plasma Membrane**—Thomas J. Buckhout*, Paul F. Bell, Douglas G. Luster, and Rufus L. Chaney

157 **Endogenous Levels and Transport of 1-Aminocyclopropane-1-Carboxylic Acid in Stamens of *Ipomoea nil* (Convolvulaceae)**—Helen Guiragossian Kiss* and Ross E. Koning

162 **Short-Term Changes in Leaf Carbon Isotope Discrimination in Salt- and Water-Stressed C_4 Grasses**—William D. Bowman*, Kerry T. Hubick, Susanne von Caemmerer, and Graham D. Farquhar

167 **Effect of Alcohols and Their Interaction with Ethylene on the Ripening of Epidermal Pericarp Discs of Tomato Fruit**—Mikal E. Saltveit, Jr.

175 **Copper Toxicity Affects Photosystem II Electron Transport at the Secondary Quinone Acceptor, Q_B**—Narendranath Mohanty, Imre Vass, and Sándor Demeter*

180 **Use of a Root Tumorigenesis Assay to Detect Genotypic Variation in Susceptibility of Thirty-four Cultivars of *Pisum sativum* to Crown Gall**—Martha C. Hawes*, Steven L. Robbs, and Steven G. Pueppke

185 **Soluble and Bound Apoplastic Activity for Peroxidase, β-D-Glucosidase, Malate Dehydrogenase, and Nonspecific Arylesterase, in Barley (*Hordeum vulgare* L.) and Oat (*Avena sativa* L.) Primary Leaves**—Zhen-Chang Li, Jerry W. McClure*, and Ann E. Hagerman

191 **Pectic Enzymes in Pectolyase. Separation, Characterization, and Induction of Ethylene in Fruits**—Elizabeth A. Baldwin and Russell Pressey*

197 **A Simple Purification of Indole-3-Acetic Acid and Abscisic Acid for GC-SIM-MS Analysis by Microfiltration of Aqueous Samples through Nylon**—James R. Dunlap* and Gene Guinn

202 **pH-Dependence of Extension Growth in *Avena* Coleoptiles and Its Implications for the Mechanism of Auxin Action**—Peter Schopfer

208 **Host-Pathogen Interactions. XXXII. A Fungal Glucan Preparation Protects Nicotianae against Infection by Viruses**—Marguerite Kopp, Jacques Rouster, Bernard Fritig, Alan Darvill, and Peter Albersheim*

217 **Evaluation of Selectable Markers for Rice Transformation**—Rudy Dekeyser, Bart Claes, Malvine Marichal, Marc Van Montagu*, and Allan Caplan

224 **Effect of Oxygen and Malate on NO_3^- Inhibition of Nitrogenase in Soybean Nodules**—Marie-Odile Heckmann*, Jean-Jacques Drevon, Pierre Saglio, and Louis Salsac

230 **Phosphorus-31 NMR Studies of Cell Wall-Associated Calcium-Phosphates in *Ulva lactuca***—Rainer G. Weich, Peter Lundberg, Hans J. Vogel*, and Paul Jensén

237 **Differential Histone Acetylation in Alfalfa (*Medicago sativa*) Due to Growth in NaCl. Responses in Salt Stressed and Salt Tolerant Callus Cultures**—Jakob H. Waterborg, Rodney E. Harrington, and Ilga Winicov*

246 **A Simple Apparatus for Screening Absolute Photosynthetic Rates of Single Algal Colonies in an Anoxic Atmosphere**—D. A. Graves and E. Greenbaum*

251 **Changes in Sugars, Enzymic Activities and Acid Phosphatase Isoenzyme Profiles of Bananas Ripened in Air or Stored in 2.5% O_2 with and without Ethylene**—Angelos K. Kanellis, Theophanes Solomos*, and Autar K. Mattoo

259 **Hydrolytic Enzyme Activities and Protein Pattern of Avocado Fruit Ripened in Air and in Low Oxygen, with and without Ethylene**—Angelos K. Kanellis, Theophanes Solomos*, and Autar K. Mattoo

267 **Isoprene Emission from Aspen Leaves. Influence of Environment and Relation to Photosynthesis and Photorespiration**—Russell K. Monson* and Ray Fall

275 **Diacyglycerol Levels Unchanged during Auxin-Stimulated Growth of Excised Hypocotyl Segments of Soybean**—D. James Morré*, Helmut Pfaffmann, Barbara Drobes, Francis E. Wilkinson, and Elmar Hartmann

280 **Influence of Boron on the Membrane Potential in *Elodea densa* and *Helianthus annuus* Roots and H^+ Extrusion of Suspension Cultured *Daucus carota* Cells**—Jürgen Blaser-Grill, Dietmar Knoppik, Anton Amberger, and Heiner Goldbach*

285 **Distinct Lipoxygenase Species Appear in the Hypocotyl/Radicle of Germinating Soybean**—Tae Kyung Park and Joseph C. Polacco*

291 **Aryl-Substituted α-Aminooxycarboxylic Acids. A New Class of Auxin Transport Inhibitors**—Gary Gardner* and James R. Sanborn

296 **Synthesis of Methylated Ethanolamine Moieties. Regulation by Choline in *Lemna***—S. Harvey Mudd* and Anne H. Datko

306 **Synthesis of Methylated Ethanolamine Moieties. Regulation of Choline by Soybean and Carrot**—S. Harvey Mudd* and Anne H. Datko

311 **Control Processes in the Induction and Relief of Thermoinhibition of Lettuce Seed Germination. Actions of Phytochrome and Endogenous Ethylene**—Hargurdeep S. Saini, Evangeline D. Consolacion, Pawan K. Bassi, and Mary S. Spencer*

316 **Changes in Assimilated ^{13}C Distribution and Soluble Acid Invertase Activity of *Zinnia elegans* Induced by Uniconazol, an Inhibitor of Gibberellin Biosynthesis**—Hong-Yul Kim* and Yoshio Suzuki

322 **Evidence for a Ferredoxin-Dependent Choline Monooxygenase from Spinach Chloroplast Stroma**—Renaud Brouquisse, Pierre Weigel, David Rhodes, Charles F. Yocum, and Andrew D. Hanson*

330 **Role of Metabolites in the Reversible Light-Activation of Pyruvate,Orthophosphate Dikinase in *Zea mays* mesophyll Cells *in Vivo***—Chrissl A. Roeske and Raymond Chollet*

338 **Senescence-Induced, Thylakoid-Bound Diisopropylfluorophosphate-Binding Protein in Spinach. Induction Pattern, Localization, and Some Proper-**

ties—Shinji Kawasaki* and Junko Takeuchi
345 **Comparison of Photomorphogenic Responses to UV Light in Red and White Cabbage (*Brassica oleracea* L.)**—Bartolomeo Lercari*, Francesco Sodi, and Cristiana Sbrana
351 **Purification and Characterization of NADH-Glutamate Synthase from Alfalfa Root Nodules**—Michael P. Anderson, Carroll P. Vance*, Gary H. Heichel, and Susan S. Miller
359 **Rhizosphere Acidification by Iron Deficient Bean Plants: The Role of Trace Amounts of Divalent Metal Ions. A Study on Roots of Intact Plants with the Use of ^{11}C- and ^{31}P-NMR**—H. Fritz Bienfait*, Henk J. Lubberding, Peter Heutink, L. Lindner, Jacques Visser, Rob Kaptein, and Klaas Dijkstra

820 **Leaf Phosphate Status, Photosynthesis and Carbon Partitioning in Sugar Beet. II. Diurnal Changes in Sugar Phosphates, Adenylates, and Nicotinamide Nucleotides**—I. Madhusudana Rao, A. Raviraj Arulanantham, and Norman Terry*

827 **Fructose 2,6-Bisphosphate Hydrolyzing Enzymes in Higher Plants**—Yvan Larondelle, Emmanuel Mertens, Emile Van Schaftingen, and Henri-Géry Hers*

835 **A Comparison of the Metabolic Fate of Fatty Acids of Different Chain Lengths in Developing Oilseeds**—James F. Battey and John B. Ohlrogge*

841 **Biosynthesis of Nonspecific Lipid Transfer Proteins in Germinating Castor Bean Seeds**—Shigeru Tsuboi, Shin-ichiro Watanabe, Yoshihiro Ozeki, and Mit-

suhiro Yamada*

846 **Altered Chloroplast Structure and Function in a Mutant of *Arabidopsis* Deficient in Plastid Glycerol-3-Phosphate Acyltransferase Activity**—Ljerka Kunst, John Browse, and Chris Somerville*

854 **Effect of Temperature on Gibberellin (GA) Responsiveness and on Endogenous GA_1 Content of Tall and Dwarf Wheat Genotypes**—Moshe J. Pinthus*, Michael D. Gale, Nigel E. J. Appleford, and John R. Lenton

860 **Induction of Alcohol Dehydrogenase and Lactate Dehydrogenase in Hypoxically Induced Barley**—Allen G. Good* and William L. Crosby

867 **Electrolyte Leakage, Lipoxygenase, and Lipid Peroxidation Induced in Tomato Leaf Tissue by Specific and Nonspecific Elicitors from *Cladosporium fulvum***—Tobin L. Peever and Verna J. Higgins*

876 **Hormones and Pod Development in Oilseed Rape (*Brassica napus*)**—Pierre de Bouille*, Bruno Sotta, Emile Miginiac, and André Merrien

881 **Light Response of CO_2 Assimilation, Dissipation of Excess Excitation Energy, and Zeaxanthin Content of Sun and Shade Leaves**—Barbara Demmig-Adams*, Klaus Winter, Almuth Krüger, and Franz-Christian Czygan

887 **Zeaxanthin and the Induction and Relaxation Kinetics of the Dissipation of Excess Excitation Energy in Leaves in 2% O_2, 0% CO_2**—Barbara Demmig-Adams*, Klaus Winter, Almuth Krüger, and Franz-Christian Czygan

894 **Zeaxanthin Synthesis, Energy Dissipation, and Photoprotection of Photosystem II at Chilling Temperatures**—Barbara Demmig-Adams*, Klaus Winter, Almuth Krüger, and Franz-Christian Czygan

899 **Cytokinin Oxidase from Wheat. Partial Purification and General Properties**—Michel Loloue* and J. Eugene Fox

907 **Hormone Levels and Apical Dominance in the Aquatic Fern. *Marsilea drummondii* A.Br.**—Gilles Pilate, Lucienne Sossountzov*, and Emile Miginiac

913 **The Proton Electrochemical Transmembrane Gradients Generated by the Transfer Cells of the Haustorium of *Polytrichum formosum* and Their Use in the Uptake of Amino Acids**—Sylvie Renault, Chantal Despeghel-Caussin, Jean-Louis Bonnemain*, and Serge Delrot

921 **Interruption of Somatic Embryogenesis in *Daucus carota* L. by 5-Bromodeoxyuridine**—John C. Thomas*, Craig Nessler, and Frank Katterman

928 **An Analysis of the Control of Phosphorylation-Coupled Respiration in Isolated Plant Mitochondria**—Anna C. Padovan, Ian B. Dry, and Joseph T. Wiskich*

934 **Target Molecular Size and Sodium Dodecyl Sulfate-Polyacrylamide Gel Electrophoresis Analysis of the ATP- and Pyrophosphate-Dependent Proton Pumps from Maize Root Tonoplast**—Alain Chanson and Paul-Emile Pilet*

939 **Two Modes of Rubidium Uptake in Sunflower Plants**—Manuel Benlloch*, Inés Moreno, and Alonso Rodriguez-Navarro

943 **A Mutant of *Arabidopsis* Deficient in Desaturation of Palmitic Acid in Leaf Lipids**—Ljerka Kunst, John Browse, and Chris Somerville*

948 **Crassulacean Acid Metabolism and Photochemical Efficiency of Photosystem II in the Adaxial and Abaxial Parts of the Succulent Leaves of *Kalanchoë daigremontiana* Grown at Four Photon Flux Densities**—Klaus Winter* and Gabriele Awender

955 **Lipid Composition of Plasma Membranes and Endomembranes Prepared from Roots of Barley (*Hordeum vulgare* L.). Effects of Salt**—Dennis J. Brown* and Frances M. DuPont

962 **Nitrate Effects on Nitrate Reductasae Activity and Nitrite Reductase mRNA Levels in Maize Suspension Cultures**—Laura S. Privalle*, Kristi N. Lahners, Martha A. Mullins, and Steven Rothstein

968 **Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase Activase Protein Prevents the *in Vitro* Decline in Activity of Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase**—Simon P. Robinson and Archie R. Portis, Jr.*

972 **Developmental Control of Apiogalacturonan Biosynthesis and UDP-Apiose Production in a Duckweed**—Jane M. Longland, Stephen C. Fry*, and Anthony J. Trewavas

977 **Partial Purification and Characterization of Three Flavonol-Specific Sulfotransferases from *Flaveria chloraefolia***—Luc Varin and Ragai K. Ibrahim*

982 **Electrogenic ATPase Activity on the Peribacteroid Membrane of Soybean (*Glycine max* L.) Root Nodules**—Michael K. Udvardi* and David A. Day

988 **Putrescine-Induced Wounding and Its Effects on Membrane Integrity and Ion Transport Processes in Roots of Intact Corn Seedlings**--Joseph M. DiTomaso, Jon E. Shaff, and Leon V. Kochian*

996 **Regulation of 5-Aminolevulinic Acid Synthesis in Developing Chloroplasts. I. Effect of Light/Dark Treatments *in Vivo* and in Organello**—Laiqiang Huang and Paul A. Castelfranco*

1003 **Regulation of 5-Aminolevulinic Acid (ALA) Synthesis in Developing Chloroplasts. II. Regulation of ALA-Synthesizing Capacity by Phytochrome**—Laiqiang Huang, Bruce A. Bonner, and Paul A. Castelfranco*

1009 **Lysophosphatidylcholine Stimulates ATP Dependent Proton Accumulation in Isolated Oat Root Plasma Membrane Vesicles**—Michael Gjedde Palmgren* and Marianne Sommarin

1015 **Synthesis of Lectin-Like Protein in Developing Cotyledons of Normal and Phytohemagglutinin-Deficient *Phaseolus vulgaris***—Alessandro Vitale*, Monica Zoppè, M. Serena Fabbrini, Annamaria Genga, Liliana Rivas, and Roberto Bollini

1022 **Environmental Effects on Photorespiration of C_3-C_4 Species. I. Influence of CO_2 and O_2 during Growth on Photorespiratory Characteristics and Leaf Anatomy**—George T. Byrd and R. Harold Brown*

1029 **Relationship between the Quantum Efficiencies of Photosystems I and II in Pea Leaves**—Jeremy Harbinson*, Bernard Genty, and Neil R. Baker

1035 **^{14}C Fixation by Leaves and Leaf Cell Protoplasts of the Submerged Aquatic Angiosperm *Potamogeton lucens*: Carbon Dioxide or Bicarbonate?**—Marten Staal, J. Theo M. Elzenga, and Hidde B. A. Prins*

1041 **Enhancement of Thermal Injury to Photosynthesis in Wheat Plants and Thylakoids by High Light Intensity**—Kassim Al-Khatib and Gary M. Paulsen*

1049 **Chilling-Induced Lipid Degradation in Cucumber (*Cucumis sativa* L. cv Hybrid C) Fruit**—Kirk L. Parkin* and Shu-Jung Kuo

1057 **Calvin-Benson Cycle Enzymes in Guard-Cell Protoplasts from *Vicia faba* L. Implications for the Greater Utilization of Phosphoglycerate/Dihydroxyacetone Phosphate Shuttle between Chloroplasts and the Cytosol**—Ken-ichiro Shimazaki*, Junko Terada, Kiyoshi Tanaka, and Noriaki Kondo

1065 **Induction of Proteinase Inhibitors in Tobacco Cell Suspension Culture by Elicitors of *Phytophthora parasitica* var. *nicotianae***—Martina Rickauer, Joëlle Fournier, and Marie-Thérèse Esquerré-Tugay

1071 **Hydroxamic Acid Glucosyltransferases from Maize Seedlings**—Bryan A. Bailey* and Russell L. Larson

1077 ***b*-Type Cytochromes in Higher Plant Plasma Membranes**—Han Asard*, Mireille Venken, Roland Caubergs, Willem Reijnders, Fred L. Oltmann, and Jan A. De Greef

1084 **Evidence for Chloroplastic Succinate Dehydrogenase Participating in the Chloroplastic Respiratory and Photosynthetic Electron Transport Chains of *Chlamydomonas reinhardtii***—Kenneth O. Willeford*, Zoltán Gombos, and Martin Gibbs

1088 **Plasma Membrane ATPase Activity following Reversible and Irreversible Freezing Injury**—S. Iswari and Jiwan P. Palta*

1096 **Molecular Cloning of Osmotin and Regulation of Its Expression by ABA and Adaptation to Low Water Potential**—Narendra K. Singh, Donald E. Nelson*, David Kuhn, Paul M. Hasegawa, and Ray A. Bressan

1102 **Salt Stress-Induced Cytoplasmic Acidification and Vacuolar Alkalization in *Nitellopsis obtusa* Cells. *In Vivo* ^{31}P-Nuclear Magnetic Resonance Study**—Maki Katsuhara*, Kazuyuki Kuchitsu, Kazuhiko Takeshige, and Masashi Tazawa

1108 **Role of Calcium in Phytochrome-Controlled Nyctinastic Movements of *Albizzia lophantha* Leaflets**—Luisa Moysset* and Esther Simon

1115 **Phosphatidylinositol 4,5-Bisphosphate Phospholipase C and Phosphomonoesterase in *Dunaliella salina* Membranes**—Kregg J. Einspahr, Thomas C. Peeler, and Guy A. Thompson, Jr.*

1121 **Relationship between Thermal Transitions and Freezing Injury in Pea and Soybean Seeds**—Christina W. Vertucci

1129 **Tissue and Cellular Distribution of Glutamine Synthetase in Roots of Pea (*Pisum sativum*) Seedlings**—Louis -P. Vézina* and Jean R. Langlois

1134 **Enhanced Thermal Tolerance of Photosynthesis and Altered Chloroplast Ultrastructure in a Mutant of *Arabidopsis* Deficient in Lipid Desaturation**—Suzanne Hugly, Ljerka Kunst, John Browse, and Chris Somerville*

1143 **Symplastic Transport of Carboxyfluorescein in Staminal Hairs of *Setcreasea purpurea* Is Diffusive and Includes Loss to the Vacuole**—Joseph E. Tucker, David Mauzerall, and Edward B. Tucker*

1148 **An Immunological Approach to Gibberellin Purification and Quantification**—Valerie A. Smith* and Jake MacMillan

1156 **Characterization of the Heat Shock Response in Cultured Sugarcane Cells. I. Physiology of the Heat Shock Response and Heat Shock Protein Synthesis**—Stefan Moisyadi and H. Michael Harrington*

1163 **Ozone Concentration in Leaf Intercellular Air Spaces Is Close to Zero**—Agu Laisk*, Olevi Kull, and Heino Moldau

1168 **Sources of Carbon for Export from Spinach Leaves throughout the Day**—Jerome C. Servaites, Bernadette R. Fondy, Bin Li, and Donald R. Geiger*

1175 **Protoporphyrin IX Content Correlates with Activity of Photobleaching Herbicides**—Jose M. Becerril and Stephen O. Duke*

1182 **Characterization of a Xylose-Specific Antiserum That Reacts with the Complex Asparagine-Linked Glycans of Extracellular and Vacuolar Glycoproteins**—Michel Laurière, Christiane Laurière, Maarten J. Chrispeels*, Kenneth D. Johnson, and Arnd Sturm

1189 **Composition and Structure of Starch from Taproots of Contrasting Genotypes of *Medicago sativa* L.**—Jerry J. Fankhauser, Jr., Jeffrey J. Volenec*, and Geoffrey A. Brown

1195 **Adaptation of *Chlamydomonas reinhardtii* High-CO_2-Requiring Mutants to Limiting CO_2**—Kensaku Suzuki and Martin H. Spalding*

1201 **Growth Rates and Assimilate Partitioning in the Elongation Zone of Tall Fescue Leaf Blades at High and Low Irradiance**—Hans Schnyder and Curtis J. Nelson*

1207 **Comparison of the Lipid Composition of Oat Root and Coleoptile Plasma Membranes. Lack of Short-Term Change in Response to Auxin**—Richard P. Sandstrom and Robert E. Cleland*

1214 **Transient Accumulation of Nitrite Reductase mRNA in Maize following the Addition of Nitrate**—Vance Kramer, Kristine Lahners, Eduard Back, Laura S. Privalle*, and Steven Rothstein

1221 **Use of Carbon Oxysulfide, a Structural Analog of CO_2, to Study Active CO_2 Transport in the Cyanobacterium *Synechococcus* UTEX 625**—Anthony G. Miller*, George S. Espie, and David T. Canvin

Number 4. August

COMMUNICATIONS

1233 **Topography of Photosynthetic Activity of Leaves Obtained from Video Images of Chlorophyll Fluorescence**—Paul F. Daley*, Klaus Raschke, J. Timothy Ball, and Joseph A. Berry

1239 **Inhibition of Plant Protoporphyrinogen Oxidase by the Herbicide Acifluorfen-Methyl**—Debra A. Witkowski and Blaik P. Halling*

1243 **A Unique Phenotype in Heterozygotes of the Auxin-Insensitive Mutant of Tomato, *diageotropica***—Virginia M. Ursin and Kent J. Bradford*

1246 **Carbohydrates Stimulate Ethylene Production in Tobacco Leaf Discs. III. Stimulation of Enzymic Hydrolysis of Indole-3-Acetyl-L-Alanine**—Shimon Meir, Joseph Riov, Sonia Philosoph-Hadas, and Nehemia Aharoni*

1249 **Sulfide-Resistant Respiration in Leaves of *Elodea canadensis* Michx. Comparison with Cyanide-Resistant Respiration**—Joaquim Azcón-Bieto*, Miquel Ribas-Carbó, Miquel A. González-Meler, and Josep Peñuelas

1252 **Preferential Loss of an Abundant Storage Protein from Soybean Pods during Seed Development**—Paul E. Staswick

1256 **Heat Shock Protein Synthesis Induced by Methomyl in Maize (*Zea mays* L.) Seedlings**—Carol A. B. Rees*, Annette M. Gullons, and David B. Walden

1262 **Regulation of Protein Synthesis during Photomorphogenesis of Gametophytes of the Fern *Onoclea sensibilis***—Kanjana Chansa-Ngavej and V. Raghavan*

1267 **Lethal Hydroxyl Radical Production in Paraquat Treated Plants**—Charles F. Babbs*, Jo Ann Pham, and Ronald C. Coolbaugh

1271 **Salinity Stress Increases Cytoplasmic Ca Activity in Maize Root Protoplasts**—Jonathan Lynch, Vito S. Polito*, and André Läuchli

1275 **Phosphate Starvation Inducible 'Bypasses' of Adenylate and Phosphate Dependent Glycolytic Enzymes in *Brassica nigra* Suspension Cells**—Stephen M. G. Duff, Greg B. G. Moorhead, Daniel D. Lefebvre, and William C. Plaxton*

ARTICLES

1279 **Rapid Cycling of Autophosphorylation of a Ca^{2+}-Calmodulin Regulated Plasma Membrane Located Protein Kinase from Pea**—David P. Blowers* and Anthony J. Trewavas

1286 **Isoenzymes of Superoxide Dismutase in Nodules of *Phaseolus vulgaris* L., *Pisum sativum* L., and *Vigna unguiculata* (L.) Walp**—Manuel Becana*, Francisco J. Paris, Luisa M. Sandalio, and Luis A. Del Río

1293 **Inhibitory Effect of Gabaculine on 5-Aminolevulinate Dehydratase Activity in Radish Seedlings**—Simo J. Tchuinmogne, Claude Huault, Abdelkader Aoues, and Alain P. Balangé*

1298 **Thermal Regulation of Phosphoenolpyruvate Carboxylase and Ribulose-1,5-Bisphosphate Carboxylase in C_3 and C_4 Plants Native to Hot and Temperate Climates**—Sibdas Ghosh, Shimon Gepstein, Bernard R. Glick, John J. Heikkila, and Erwin B. Dumbroff*

1305 **Anaerobic Induction of Alanine Aminotransferase in Barley Root Tissue**—Allen G. Good* and William L. Crosby

1310 **Superoxide Dismutase Activity in Needles of Norwegian Spruce Trees (*Picea abies* L.)**—Andrea Polle, Brigitte Krings, and Heinz Rennenberg*

1316 **Zeatin Glycosylation Enzymes in *Phaseolus*. Isolation of *O*-Glucosyltransferase from *P. lunatus* and Comparison to *O*-Xylosyltransferase from *P. vulgaris***—Susan C. Dixon, Ruth C. Martin, Machteld C. Mok, Gordon Shaw, and David W. S. Mok*

1322 **Partitioning of Noncyclic Photosynthetic Electron Transport to O_2-Dependent Dissipative Processes as Probed by Fluorescence and CO_2 Exchange**—Richard B. Peterson

1329 **Circadian Stomatal Rhythms in Epidermal Peels from *Vicia faba***—Holly L. Gorton*, William E. Williams, Mary Elizabeth Binns, Craig N. Gemmell, Ellen A. Leheny, and Andrew C. Shepherd

1335 **Gibberellic Acid Stimulation of Cucumber Hypocotyl Elongation. Effects on Growth, Turgor, Osmotic Pressure, and Cell Wall Properties**—Anne Taylor and Daniel J. Cosgrove*

1341 **Auxin and Ethylene Regulation of Petiole Epinasty in Two Developmental Mutants of Tomato, *diageotropica* and *Epinastic***—Virginia M. Ursin and Kent J. Bradford*

1347 **Lack of Systemic Suppression of Nodulation in Split Root Systems of Supernodulating Soybean (*Glycine max* [L.] Merr.) Mutants**—Jane E. Olsson, Patricia Nakao, B. Ben Bohlool, and Peter M. Gresshoff*

1353 **β-D-Glucan Antibodies Inhibit Auxin-Induced Cell Elongation and Changes in the Cell Wall of *Zea* Coleoptile Segments**—Takayuki Hoson and Donald J. Nevins*

1359 **Post-Transcriptional Control of Sucrose Synthase Expression in Anaerobic Seedlings of Maize**—Earl W. Taliercio and Prem S. Chourey*

1365 **Influence of Cadmium on Water Relations, Stomatal Resistance, and Abscisic Acid Content in Expanding Bean Leaves**—Charlotte Poschenrieder, Benet Gunsé, and Juan Barceló*

1372 **Transcriptional Analysis of Polygalacturonase and Other Ripening Associated Genes in Rutgers, *rin*, *nor*, and *Nr* Tomato Fruit**—Dean DellaPenna, James E. Lincoln, Robert L. Fischer, and Alan B. Bennett*

1378 **Polyamine Synthesis in Maize Cell Lines**—Andrew Hiatt

1382 **Isolation of Guard Cell Protoplasts from Mechanically Prepared Epidermis of *Vicia faba* Leaves**—Tamara Kruse, Gary Tallman*, and Eduardo Zeiger

1387 **Characterization of a Soybean Leaf Protein That Is Related to the Seed Lectin and Is Increased with Pod Removal**—Steven R. Spilatro and James Michael Anderson*

1394 **Sucrose-Metabolizing Enzymes in Transport Tissues and Adjacent Sink Structures in Developing Citrus Fruit**—Cadance A. Lowell, Patricia T. Tomlinson, and Karen E. Koch*

1403 **Structure and Characterization of a cDNA Clone for Phenylalanine Ammonia-Lyase from Cut-Injured Roots of Sweet Potato**—Ysohiyuki Tanaka*, Makoto Matsuoka, Naoki Yamanoto, Yuko Ohashi, Yuriko Kano-Murakami, and Yoshihiro Ozeki

1408 **Gas-Exchange Properties of Salt-Stressed Olive (*Olea europea* L.) Leaves**—Guido Bongi and Francesco Loreto*

1417 **More Manganese Accumulates in Maple Sun Leaves than in Shade Leaves**—Douglas C. McCain and John L. Markley*

1422 **Separation and Characterization of Inositol Phospholipids from the Pulvini of *Samanea saman***—Gary G. Coté, Anthony L. DePass, Lynne M. Quarmby, Bonnie F. Tate, M. J. Morse, Ruth L. Satter, and Richard C. Crain*

1429 **Identification and Characterization of the Ca^{2+}-ATPase which Drives Active Transport of Ca^{2+} at the Plasma Membrane of Radish Seedlings**—Franca Rasi-Caldogno*, Maria Chiara Pugliarello, Claudio Olivari, and Maria Ida De Michelis

1435 **Syringomycin, a Bacterial Phytotoxin, Closes Stomata**—Keith A. Mott* and Jon Y. Takemoto

1440 **Maintenance of Low Cl^- Concentrations in Mesophyll Cells of Leaf Blades of Barley Seedlings Exposed to Salt Stress**—Cheng X. Huang* and Reinhard F. M. Van Steveninck

1444 **A Comparison of the Effect of Salt on Polypeptides and Translatable mRNAs in Roots of a Salt-Tolerant and a Salt-Sensitive Cultivar of Barley**—William J. Hurkman*, Chester S. Fornari, and Charlene K. Tanaka

1457 **Selection and Characterization of Tobacco Plants with Novel O_2-Resistant Photosynthesis**—Israel Zelitch

1465 **Acclimation of Two Tomato Species to High Atmospheric CO_2. I. Sugar and Starch Concentrations**—Serge Yelle, Richard C. Beeson, Jr., Marc J. Trudel, and André Gosselin*

1473 **Acclimation of Two Tomato Species to High Atmospheric CO_2. II. Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase and Phospho*enol*pyruvate Carboxylase**—Serge Yelle, Richard C. Beeson, Jr., Marc J. Trudel, and André Gosselin*

1478 **Effects of Cooling Rate on Seeds Exposed to Liquid Nitrogen Temperatures**—Christina W. Vertucci

1486 **Role of Protein Synthesis in Regulation of Phycobiliprotein mRNA Abundance by Light Quality in *Fremyella diplosiphon***—Ralf Oelmüller, A. R. Grossman, and Winslow R. Briggs*

1492 **Inhibition of Photosystem II Precedes Thylakoid Membrane Lipid Peroxidation in Bisulfite-Treated Leaves of *Phaseolus vulgaris***—P. S. Covello, A. Chang, E. B. Dumbroff, and J. E. Thompson*

1498 **Cytosolic Phosphofructokinase from Spinach Leaves. I. Purification, Characteristics, and Regulation**—Rainer E. Häusler*, Joseph A. M. Holtum, and Erwin Latzko

1506 **Cytosolic Phosphofructokinase from Spinach Leaves. II. Affinity for Mg^{2+} and Nucleoside Phosphates**—Rainer E. Häusler*, Joseph A. M. Holtum, and Erwin Latzko

1513 **Intact Chloroplasts Show Ca^{2+}-Gated Switching between Localized and Delocalized Proton Gradient Energy Coupling (ATP Formation)**—Gisela G. Chiang and Richard A. Dilley*

1524 **Selective Delipidation of the Plasma Membrane by Surfactants. Enrichment of Sterols and Activation of ATPase**—Richard P. Sandstrom and Robert E. Cleland*

1532 **Uptake of Acidic and Basic Sugar Derivatives in *Lemna gibba* G1**—Amparo Sanz* and Cornelia I. Eberius

1538 **Transfer of C_4 Photosynthetic Characters through Hybridization of *Flaveria* Species**—Randall G. Cameron, Carole L. Bassett, J. H. Bouton, and R. Harold Brown*

1546 **Diacylglycerol Kinase from Suspension Cultured Plant Cells. Purification and Properties**—Josef Wissing, Sabina Heim, and Karl G. Wagner*

1552 **Biosynthesis of the Cyanogenic Glucoside Dhurrin in Seedlings of *Sorghum bicolor* (L.) Moench and Partial Purification of the Enzyme System Involved**—Barbara Ann Halkier and Birger Lindberg Møller*

1560 **Changes in Level and Activity of Phospholipid Transfer Protein during Maturation and Germination of Maize Seeds**—Michèle Grosbois, Françoise Guerbette, and Jean-Claude Kader*

1565 **Carbamoyl Phosphate Synthetase, Ornithine Transcarbamylase, and Aspartate Transcarbamylase Activities in the Pea Ovary. Changes with Senescence of the Unpollinated Ovary or with Fruit Set Induced by Gibberellic Acid**—Antonio Garcia-España, Juan Carbonell, and Vicente Rubio*

1570 **Differential Accumulation of a Transcript Driven by the CaMV 35S Promoter in Transgenic Tobacco**—John D. Williamson, Marlaya E. Hirsch-Wyncott, Brian A. Larkins, and Stanton B. Gelvin*

1577 **Aspartokinase of *Lemna paucicostata* Hegelm. 6746**—John Giovanelli*, S. Harvey Mudd, and Anne H. Datko

1584 **Regulatory Structure of the Biosynthetic Pathway for the Aspartate Family of Amino Acids in *Lemna paucicostata* Hegelm. 6746, with Special Reference to the Role of Aspartokinase**—John Giovanelli*, S. Harvey Mudd, and Anne H. Datko

1600 **Comparison of Phase Shifts of the Circadian Rhythm of K^+ Uptake in *Lemna gibba* G3 by Various**

Amino Acid Analogs—Takao Kondo

1609 **Photoinhibition at Low Temperature in Chilling-Sensitive and -Resistant Plants**—Suzan E. Hetherington*, Jie He, and Robert M. Smillie

1616 **Endopeptidases in the Stroma and Thylakoids of Pea Chloroplasts**—Janet E. Musgrove, Peter D. Elderfield, and Colin Robinson*

1622 **Aspartate Aminotransferase in Alfalfa Root Nodules. I. Purification and Partial Characterization**—Stephen M. Griffith* and Carroll P. Vance

1630 **An Enzyme Mediating the Conversion of Zeatin to Dihydrozeatin in *Phaseolus* Embryos**—Ruth C. Martin, Machteld C. Mok, Gordon Shaw, and David W. S. Mok*

1636 **Characterization of the Effects of Divalent Cations on the Coupled Activities of the H^+-ATPase in Tonoplast Vesicles**—Shu-I Tu*, Edwin Nungesser, and David Brauer

1644 **Nitrogen Nutrition of Nodules in Relation to 'N-Hunger' in Cowpea (*Vigna unguiculata* L. Walp)**—Craig A. Atkins*, John S. Pate, Paul J. Sanford, Felix D. Dakora, and Ian Matthews

Volume Contents by Subject

METABOLISM AND ENZYMOLOGY

13 **An Assessment of the Rubisco Inhibitor. 2-Carboxyarabinitol-1-Phosphate and D-Hamamelonic Acid 2¹-Phosphate Are Identical Compounds**—Erwin Beck*, Renate Scheibe, and Josef Reiner

29 **Differences in the Anaerobic Lactate-Succinate Production and in the Changes of Cell Sap pH for Plants with High and Low Resistance to Anoxia**—Faustino Menegus*, Liliana Cattaruzza, Alberto Chersi, and Giovanni Fronza

41 **A Cerulenin Insensitive Short Chain 3-Ketoacyl-Acyl Carrier Protein Synthase in *Spinacia oleracea* Leaves**—Jan G. Jaworski*, Richard C. Clough, and Susan R. Barnum

48 **Effect of Castanospermine and Related Polyhydroxyalkaloids on Purified Myrosinase from *Lepidium sativum* Seedlings**—Paul L. Durham and Jonathan E. Poulton*

70 **Chloride Inhibition of Spinach Nitrate Reductase**—Michael J. Barber*, Brian A. Notton, Christopher J. Kay, and Larry P. Solomonson

75 **Immunological Comparison of the Starch Branching Enzymes from Potato Tubers and Maize Kernels**—Greetje H. Vos-Scheperkeuter*, Janny G. de Wit, Anne S. Ponstein, Will J. Feenstra, and Bernard Witholt

91 **Soluble Sugars as the Carbohydrate Reserve for CAM in Pineapple Leaves. Implications for the Role of Pyrophosphate:6-Phosphofructokinase in Glycolysis**—Nancy Wieland Carnal* and Clanton C. Black

101 **UDP-Glucose: (1,3)-β-Glucan Synthase from *Daucus carota* L. Characterization, Photoaffinity, Labeling, and Solubilization**—Stephen G. Lawson, Theresa L. Mason, Robert D. Sabin, Margaret E. Sloan, Richard R. Drake, Boyd E. Haley, and Bruce P. Wasserman*

125 **Metabolism of Fatty Acid Hydroperoxides by *Chlorella pyrenoidosa***—Brady A. Vick* and Don C. Zimmerman

185 **Soluble and Bound Apoplastic Activity for Peroxidase, β-D-Glucosidase, Malate Dehydrogenase, and Nonspecific Arylesterase, in Barley (*Hordeum vulgare* L.) and Oat (*Avena sativa* L.) Primary Leaves**—Zhen-Chang Li, Jerry W. McClure*, and Ann E. Hagerman

191 **Pectic Enzymes in Pectolyase. Separation, Characterization, and Induction of Ethylene in Fruits**—Elizabeth A. Baldwin and Russell Pressey*

224 **Effect of Oxygen and Malate on NO_3^- Inhibition of Nitrogenase in Soybean Nodules**—Marie-Odile Heckmann*, Jean-Jacques Drevon, Pierre Saglio, and Louis Salsac

251 **Changes in Sugars, Enzymic Activities and Acid Phosphatase Isoenzyme Profiles of Bananas Ripened in Air or Stored in 2.5% O_2 with and without Ethylene**—Angelos K. Kanellis, Theophanes Solomos*, and Autar K. Mattoo

259 **Hydrolytic Enzyme Activities and Protein Pattern of Avocado Fruit Ripened in Air and in Low Oxygen, with and without Ethylene**—Angelos K. Kanellis, Theophanes Solomos*, and Autar K. Mattoo

275 **Diacyglycerol Levels Unchanged during Auxin-Stimulated Growth of Excised Hypocotyl Segments of Soybean**—D. James Morré*, Helmut Pfaffmann, Barbara Drobes, Francis E. Wilkinson, and Elmar Hartmann

285 **Distinct Lipoxygenase Species Appear in the Hypocotyl/Radicle of Germinating Soybean**—Tae Kyung Park and Joseph C. Polacco*

296 **Synthesis of Methylated Ethanolamine Moieties. Regulation by Choline in *Lemna***—S. Harvey Mudd* and Anne H. Datko

306 **Synthesis of Methylated Ethanolamine Moieties. Regulation of Choline by Soybean and Carrot**—S. Harvey Mudd* and Anne H. Datko

322 **Evidence for a Ferredoxin-Dependent Choline Monooxygenase from Spinach Chloroplast Stroma**—Renaud Brouquisse, Pierre Weigel, David Rhodes, Charles F. Yocum, and Andrew D. Hanson*

330 **Role of Metabolites in the Reversible Light-Activation of Pyruvate,Orthophosphate Dikinase in *Zea mays* mesophyll Cells *in Vivo***—Chrissl A. Roeske and Raymond Chollet*

367 **Malic Enzymes of Higher Plants. Characteristics, Regulation, and Physiological Function**—Randolph T. Wedding

380 **Red Light-Induced Accumulation of Ubiquitin-Phytochrome Conjugates in Both Monocots and Dicots**—Merten Jabben, John Shanklin, and Richard D. Vierstra*

385 **Low Oxygen Inhibition of Photosynthesis Is Caused by Inhibition of Starch Synthesis**—Thomas D. Sharkey* and Terry L. Vassey

401 **Effect of pH on the Kinetic Parameters of NADP-Malic Enzyme from a C_4 *Flaveria* (Asteraceae) Species**—A. Scott Holaday* and Gary W. Lowder

413 **Microsomal Phosphatidate Phosphatase in Maturing Safflower Seeds**—Ken'ichi Ichihara*, Sadahiko Norikura, and Shoji Fujii

420 **Distribution of ^{15}N within Pea, Lupin, and Soybean Nodules**—Daniel H. Kohl*, Paul H. S. Reynolds, and Georgia Shearer

427 **Maize Leaf Phosphoenolpyruvate Carboxylase. Oligomeric State and Activity in the Presence of Glycerol**—Florencio E. Podestá and Carlos S. Andreo*

470 **Correlation between Carbonic Anhydrase Activity and Inorganic Carbon Internal Pool in Strain *Synechocystis* PCC 6174**—Sylvie Bédu*, Gilles Peltier, and Françoise Joset

500 **Photorespiratory Rates in Wheat and Maize as Determined by ^{18}O-Labeling**—Edward J. de Veau* and John E. Burris

522 **A Mutant of *Arabidopsis* Deficient in the Chloroplast 16:1/18:1 Desaturase**—John Browse*, Ljerka Kunst, Shawn Anderson, Suzanne Hugly, and Chris Somerville

530 **Vacuolar Acid Hydrolysis as a Physiological Mechanism for Sucrose Breakdown**—Ed Echeverria* and

Jacqueline K. Burns

534 **Antigenic Crossreactivity between Bacterial and Plant Cytochrome P-450 Monoxygenases**—Cassie B. Stewart and Mary A. Schuler*

549 **Fatty Acid Acylated Proteins of the Halotolerant Alga *Dunaliella salina***—Martha Stephenson, Phillip E. Ryals, and Guy A. Thompson, Jr.*

567 **A β-Galactosidase from Radish (*Raphanus sativus* L.) Seeds**—Masayuki Sekimata, Kiyoshi Ogura, Yoichi Tsumuraya, Yohichi Hashimoto*, and Shigeru Yamamoto

582 **$\delta^{13}C$ Values in Maize Leaf Correlate with Phospho*enol*pyruvate Carboxylase Levels**—Hideo Sasakawa, Bambang Sugiharto, Marion H. O'Leary*, and Tatsuo Sugiyama

610 **Galactolipids of Thylakoid Pigment Protein Complexes Separated Electrophoretically from Thylakoids of *Dunaliella salina* Labeled with Radioactive Fatty Acids**—Sung Ho Cho and Guy A. Thompson, Jr.*

624 **Arginine Metabolism in Developing Soybean Cotyledons. I. Relationship to Nitrogen Nutrition**—Barry J. Micallef and Barry J. Shelp*

631 **Arginine Metabolism in Developing Soybean Cotyledons. II. Biosynthesis**—Barry J. Micallef and Barry J. Shelp*

635 **Characterization of Sucrolysis via the Uridine Diphosphate and Pyrophosphate-Dependent Sucrose Synthase Pathway**—Dian-Peng Xu, Shi-Jean S. Sung, Tadeusz Loboda, Paul P. Kormanik, and Clanton C. Black*

648 **Activation of Higher Plant Phospho*enol*pyruvate Carboxylases by Glucose-6-Phosphate**—Randolph T. Wedding*, M. Kay Black, and Christopher R. Meyer

653 **Aerobic and Anaerobic Respiration in the Intact Spinach Chloroplast**—Kiran Jit K. Ahluwalia, Kenneth O. Willeford*, and Martin Gibbs

673 **Degradation of 2-Carboxyarabinitol 1-Phosphate by a Specific Chloroplast Phosphatase**—Gabriel P. Holbrook, George Bowes, and Michael E. Salvucci*

679 **Purification and Properties of 2-Carboxy-D-Arabinitol 1-Phosphatase**—Michael E. Salvucci* and Gabriel P. Holbrook

686 **Use of Per-C-Deuterated *myo*-Inositol for Study of Cell Wall Synthesis in Germinating Beans**—Ken Sasaki*, Gerald Nagahashi, Michael R. Gretz, and Iain E. P. Taylor

720 **The Relationship between Ribulose Bisphosphate Concentration, Dissolved Inorganic Carbon (DIC) Transport and DIC-Limited Photosynthesis in the Cyanobacterium *Synechococcus leopoliensis* Grown at Different Concentrations of Inorganic Carbon**—William P. Mayo, Ivor R. Elrifi, and David H. Turpin*

734 **Purification and Characterization of a Phospho*enol*pyruvate Phosphatase from *Brassica nigra* Suspension Cells**—Stephen M. G. Duff, Daniel D. Lefebvre, and William C. Plaxton*

754 **Compartmentation of Peroxisomal Enzymes in Algae of the Group of Prasinophyceae. Occurrence of Possible Microbodies without Catalase**—H. Stabenau*, U. Winkler, and W. Säftel

760 **Changes in the Enzymes for Fatty Acid Synthesis and Desaturation during Acclimation of Developing Soybean Seeds to Altered Growth Temperature**—Thomas M. Cheesbrough

773 **Changes in Photosynthesis and Other Chloroplast Traits in Lanceolate Leaflet Isoline of Soybean**—F. J. M. Sung* and J. J. Chen

788 **Localization of the Enzymes Involved in the Photoevolution of H_2 from Acetate in *Chlamydomonas reinhardtii***—Kenneth O. Willeford* and Martin Gibbs

799 **Subcellular Distribution of Enzymes of Glycolate Metabolism in the Alga *Cyanidium caldarium***—Wolfgang Gross* and Harry Beevers

827 **Fructose 2,6-Bisphosphate Hydrolyzing Enzymes in Higher Plants**—Yvan Larondelle, Emmanuel Mertens, Emile Van Schaftingen, and Henri-Géry Hers*

835 **A Comparison of the Metabolic Fate of Fatty Acids of Different Chain Lengths in Developing Oilseeds**—James F. Battey and John B. Ohlrogge*

899 **Cytokinin Oxidase from Wheat. Partial Purification and General Properties**—Michel Loloue* and J. Eugene Fox

943 **A Mutant of *Arabidopsis* Deficient in Desaturation of Palmitic Acid in Leaf Lipids**—Ljerka Kunst, John Browse, and Chris Somerville*

968 **Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase Activase Protein Prevents the *in Vitro* Decline in Activity of Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase**—Simon P. Robinson and Archie R. Portis, Jr.*

977 **Partial Purification and Characterization of Three Flavonol-Specific Sulfotransferases from *Flaveria chloraefolia***—Luc Varin and Ragai K. Ibrahim*

996 **Regulation of 5-Aminolevulinic Acid Synthesis in Developing Chloroplasts. I. Effect of Light/Dark Treatments *in Vivo* and in Organello**—Laiqiang Huang and Paul A. Castelfranco*

1003 **Regulation of 5-Aminolevulinic Acid (ALA) Synthesis in Developing Chloroplasts. II. Regulation of ALA-Synthesizing Capacity by Phytochrome**—Laiqiang Huang, Bruce A. Bonner, and Paul A. Castelfranco*

1057 **Calvin-Benson Cycle Enzymes in Guard-Cell Protoplasts from *Vicia faba* L. Implications for the Greater Utilization of Phosphoglycerate/Dihydroxyacetone Phosphate Shuttle between Chloroplasts and the Cytosol**—Ken-ichiro Shimazaki*, Junko Terada, Kiyoshi Tanaka, and Noriaki Kondo

1071 **Hydroxamic Acid Glucosyltransferases from Maize Seedlings**—Bryan A. Bailey* and Russell L. Larson

1084 **Evidence for Chloroplastic Succinate Dehydrogenase Participating in the Chloroplastic Respiratory and Photosynthetic Electron Transport Chains of *Chlamydomonas reinhardtii***—Kenneth O. Wille-

ford*, Zoltán Gombos, and Martin Gibbs

1129 **Tissue and Cellular Distribution of Glutamine Synthetase in Roots of Pea (*Pisum sativum*) Seedlings**—Louis -P. Vézina* and Jean R. Langlois

1168 **Sources of Carbon for Export from Spinach Leaves throughout the Day**—Jerome C. Servaites, Bernadette R. Fondy, Bin Li, and Donald R. Geiger*

1195 **Adaptation of *Chlamydomonas reinhardtii* High-CO_2-Requiring Mutants to Limiting CO_2**—Kensaku Suzuki and Martin H. Spalding*

1221 **Use of Carbon Oxysulfide, a Structural Analog of CO_2, to Study Active CO_2 Transport in the Cyanobacterium *Synechococcus* UTEX 625**—Anthony G. Miller*, George S. Espie, and David T. Canvin

1239 **Inhibition of Plant Protoporphyrinogen Oxidase by the Herbicide Acifluorfen-Methyl**—Debra A. Witkowski and Blaik P. Halling*

1246 **Carbohydrates Stimulate Ethylene Production in Tobacco Leaf Discs. III. Stimulation of Enzymic Hydrolysis of Indole-3-Acetyl-L-Alanine**—Shimon Meir, Joseph Riov, Sonia Philosoph-Hadas, and Nehemia Aharoni*

1252 **Preferential Loss of an Abundant Storage Protein from Soybean Pods during Seed Development**—Paul E. Staswick

1275 **Phosphate Starvation Inducible 'Bypasses' of Adenylate and Phosphate Dependent Glycolytic Enzymes in *Brassica nigra* Suspension Cells**—Stephen M. G. Duff, Greg B. G. Moorhead, Daniel D. Lefebvre, and William C. Plaxton*

1279 **Rapid Cycling of Autophosphorylation of a Ca^{2+}-Calmodulin Regulated Plasma Membrane Located Protein Kinase from Pea**—David P. Blowers* and Anthony J. Trewavas

1286 **Isoenzymes of Superoxide Dismutase in Nodules of *Phaseolus vulgaris* L., *Pisum sativum* L., and *Vigna unguiculata* (L.) Walp**—Manuel Becana*, Francisco J. Paris, Luisa M. Sandalio, and Luis A. Del Río

1310 **Superoxide Dismutase Activity in Needles of Norwegian Spruce Trees (*Picea abies* L.)**—Andrea Polle, Brigitte Krings, and Heinz Rennenberg*

1316 **Zeatin Glycosylation Enzymes in *Phaseolus*. Isolation of *O*-Glucosyltransferase from *P. lunatus* and Comparison to *O*-Xylosyltransferase from *P. vulgaris***—Susan C. Dixon, Ruth C. Martin, Machteld C. Mok, Gordon Shaw, and David W. S. Mok*

1378 **Polyamine Synthesis in Maize Cell Lines**—Andrew Hiatt

1394 **Sucrose-Metabolizing Enzymes in Transport Tissues and Adjacent Sink Structures in Developing Citrus Fruit**—Cadance A. Lowell, Patricia T. Tomlinson, and Karen E. Koch*

1422 **Separation and Characterization of Inositol Phospholipids from the Pulvini of *Samanea saman***—Gary G. Coté, Anthony L. DePass, Lynne M. Quarmby, Bonnie F. Tate, M. J. Morse, Ruth L. Satter, and Richard C. Crain*

1435 **Syringomycin, a Bacterial Phytotoxin, Closes Stomata**—Keith A. Mott* and Jon Y. Takemoto

1457 **Selection and Characterization of Tobacco Plants with Novel O_2-Resistant Photosynthesis**—Israel Zelitch

1498 **Cytosolic Phosphofructokinase from Spinach Leaves. I. Purification, Characteristics, and Regulation**—Rainer E. Häusler*, Joseph A. M. Holtum, and Erwin Latzko

1506 **Cytosolic Phosphofructokinase from Spinach Leaves. II. Affinity for Mg^{2+} and Nucleoside Phosphates**—Rainer E. Häusler*, Joseph A. M. Holtum, and Erwin Latzko

1538 **Transfer of C_4 Photosynthetic Characters through Hybridization of *Flaveria* Species**—Randall G. Cameron, Carole L. Bassett, J. H. Bouton, and R. Harold Brown*

1546 **Diacylglycerol Kinase from Suspension Cultured Plant Cells. Purification and Properties**—Josef Wissing, Sabina Heim, and Karl G. Wagner*

1560 **Changes in Level and Activity of Phospholipid Transfer Protein during Maturation and Germination of Maize Seeds**—Michèle Grosbois, Françoise Guerbette, and Jean-Claude Kader*

1565 **Carbamoyl Phosphate Synthetase, Ornithine Transcarbamylase, and Aspartate Transcarbamylase Activities in the Pea Ovary. Changes with Senescence of the Unpollinated Ovary or with Fruit Set Induced by Gibberellic Acid**—Antonio Garcia-España, Juan Carbonell, and Vicente Rubio*

1577 **Aspartokinase of *Lemna paucicostata* Hegelm. 6746**—John Giovanelli*, S. Harvey Mudd, and Anne H. Datko

1584 **Regulatory Structure of the Biosynthetic Pathway for the Aspartate Family of Amino Acids in *Lemna paucicostata* Hegelm. 6746, with Special Reference to the Role of Aspartokinase**—John Giovanelli*, S. Harvey Mudd, and Anne H. Datko

1622 **Aspartate Aminotransferase in Alfalfa Root Nodules. I. Purification and Partial Characterization**—Stephen M. Griffith* and Carroll P. Vance

1630 **An Enzyme Mediating the Conversion of Zeatin to Dihydrozeatin in *Phaseolus* Embryos**—Ruth C. Martin, Machteld C. Mok, Gordon Shaw, and David W. S. Mok*

MOLECULAR BIOLOGY AND GENE REGULATION

37 **DNA Methylation and Embryogenic Competence in Leaves and Callus of Napiergrass (*Pennisetum purpureum* Schum.)**—Fionnuala M. Morrish and Indra K. Vasil*

63 **Translational Regulation of the Synthesis of *Euglena* Fumarase by Light and Ethanol**—Arnon Rikin and Steven D. Schwartzbach*

140 **Heat Shock Protein Synthesis and Thermal Tolerance in Wheat**—M. Krishnan, Henry T. Nguyen*, and John J. Burke

146 **Mutation of a Locus of *Arabidopsis thaliana* Confers Resistance to the Herbicide Isoxaben**—Dale R. Heim, Jean L. Roberts, Philip D. Pike, and Ignacio M. Larrinua*

217 **Evaluation of Selectable Markers for Rice Transfor-**

mation—Rudy Dekeyser, Bart Claes, Malvine Marichal, Marc Van Montagu*, and Allan Caplan

390 **An Examination of the Plastid DNA of Hypohaploid *Nicotiana plumbaginifolia* Plants**—Gordon C. Cannon*, K. Tran Thanh Van, Sabine Heinhorst, T. H. Trinh, and Arthur Weissbach

512 **Procedures for the Generation of Mature *Chlamydomonas reinhardtii* Zygotes for Molecular and Biochemical Analyses**—Dorothee Wegener, Ulrike Treier, and Christoph F. Beck*

516 **Coordinate Expression of Rubisco Activase and Rubisco during Barley Leaf Cell Development**—Raymond E. Zielinski*, Jeffrey M. Werneke, and Michael E. Jenkins

560 **Light Intensity Regulates the Accumulation of the Major Light-Harvesting Chlorophyll-Protein in Greening Seedlings**—James N. Mathis and Kent O. Burkey*

586 **Iron Induction of Ferritin Synthesis in Soybean Cell Suspensions**—Dominique Proudhon, Jean-François Briat, and Anne-Marie Lescure*

665 **Circadian Rhythm in the Expression of the mRNA Coding for the Apoprotein of the Light-Harvesting Complex of Photosystem II. Phytochrome Control and Persistent Far Red Reversibility**—Paraskevi Tavladoraki, Klaus Kloppstech, and Joan Argyroudi-Akoyunoglou*

690 **Molecular Cloning and Characterization of Senescence-Related Genes from Carnation Flower Petals**—Kay A. Lawton, Bin Huang, Peter B. Goldsbrough, and William R. Woodson*

714 **Cloning of cDNA Sequences Encoding the Calcium-Binding Protein, Calmodulin, from Barley (*Hordeum vulgare* L.)**—Vincent Ling and Raymond E. Zielinski*

792 **cDNA Clones for Corn Leaf NADH:Nitrate Reductase and Chloroplast NAD(P)$^+$:Glyceraldehyde-3-Phosphate Dehydrogenase. Characterization of the Clones and Analysis of the Expression of the Genes in Leaves as Influenced by Nitrate in the Light and Dark**—G. Gowri and Wilbur H. Campbell*

841 **Biosynthesis of Nonspecific Lipid Transfer Proteins in Germinating Castor Bean Seeds**—Shigeru Tsuboi, Shin-ichiro Watanabe, Yoshihiro Ozeki, and Mitsuhiro Yamada*

962 **Nitrate Effects on Nitrate Reductasae Activity and Nitrite Reductase mRNA Levels in Maize Suspension Cultures**—Laura S. Privalle*, Kristi N. Lahners, Martha A. Mullins, and Steven Rothstein

1015 **Synthesis of Lectin-Like Protein in Developing Cotyledons of Normal and Phytohemagglutinin-Deficient *Phaseolus vulgaris***—Alessandro Vitale*, Monica Zoppè, M. Serena Fabbrini, Annamaria Genga, Liliana Rivas, and Roberto Bollini

1096 **Molecular Cloning of Osmotin and Regulation of Its Expression by ABA and Adaptation to Low Water Potential**—Narendra K. Singh, Donald E. Nelson*, David Kuhn, Paul M. Hasegawa, and Ray A. Bressan

1214 **Transient Accumulation of Nitrite Reductase mRNA in Maize following the Addition of Nitrate**—Vance Kramer, Kristine Lahners, Eduard Back, Laura S. Privalle*, and Steven Rothstein

1256 **Heat Shock Protein Synthesis Induced by Methomyl in Maize (*Zea mays* L.) Seedlings**—Carol A. B. Rees*, Annette M. Gullons, and David B. Walden

1359 **Post-Transcriptional Control of Sucrose Synthase Expression in Anaerobic Seedlings of Maize**—Earl W. Taliercio and Prem S. Chourey*

1372 **Transcriptional Analysis of Polygalacturonase and Other Ripening Associated Genes in Rutgers, *rin*, *nor*, and *Nr* Tomato Fruit**—Dean DellaPenna, James E. Lincoln, Robert L. Fischer, and Alan B. Bennett*

1403 **Structure and Characterization of a cDNA Clone for Phenylalanine Ammonia-Lyase from Cut-Injured Roots of Sweet Potato**—Yoshiyuki Tanaka*, Makoto Matsuoka, Naoki Yamanoto, Yuko Ohashi, Yuriko Kano-Murakami, and Yoshihiro Ozeki

1486 **Role of Protein Synthesis in Regulation of Phycobiliprotein mRNA Abundance by Light Quality in *Fremyella diplosiphon***—Ralf Oelmüller, A. R. Grossman, and Winslow R. Briggs*

1570 **Differential Accumulation of a Transcript Driven by the CaMV 35S Promoter in Transgenic Tobacco**—John D. Williamson, Marlaya E. Hirsch-Wyncott, Brian A. Larkins, and Stanton B. Gelvin*

ENVIRONMENTAL AND STRESS PHYSIOLOGY

53 **Effects of NaCl on Metabolic Heat Evolution Rates by Barley Roots**—Richard S. Criddle, Lee D. Hansen, R. William Breidenbach, Michael R. Ward, and Ray C. Huffaker*

162 **Short-Term Changes in Leaf Carbon Isotope Discrimination in Salt- and Water-Stressed C_4 Grasses**—William D. Bowman*, Kerry T. Hubick, Susanne von Caemmerer, and Graham D. Farquhar

175 **Copper Toxicity Affects Photosystem II Electron Transport at the Secondary Quinone Acceptor, Q_B**—Narendranath Mohanty, Imre Vass, and Sándor Demeter*

230 **Phosphorus-31 NMR Studies of Cell Wall-Associated Calcium-Phosphates in *Ulva lactuca***—Rainer G. Weich, Peter Lundberg, Hans J. Vogel*, and Paul Jensén

237 **Differential Histone Acetylation in Alfalfa (*Medicago sativa*) Due to Growth in NaCl. Responses in Salt Stressed and Salt Tolerant Callus Cultures**—Jakob H. Waterborg, Rodney E. Harrington, and Ilga Winicov*

267 **Isoprene Emission from Aspen Leaves. Influence of Environment and Relation to Photosynthesis and Photorespiration**—Russell K. Monson* and Ray Fall

345 **Comparison of Photomorphogenic Responses to UV Light in Red and White Cabbage (*Brassica oleracea* L.)**—Bartolomeo Lercari*, Francesco Sodi, and Cristiana Sbrana

359 **Rhizosphere Acidification by Iron Deficient Bean**

Plants: The Role of Trace Amounts of Divalent Metal Ions. A Study on Roots of Intact Plants with the Use of ^{11}C- and ^{31}P-NMR—H. Fritz Bienfait*, Henk J. Lubberding, Peter Heutink, L. Lindner, Jacques Visser, Rob Kaptein, and Klaas Dijkstra

458 **Changes in Fructose 2,6-Bisphosphate Levels in Green Pepper (*Capsicum annuum* L.) Fruit in Response to Temperature**—Donna C. Phelps and Roy E. McDonald*

598 **Heat Shock Response of Germinating Embryos of Wheat. Effects of Imbibition Time and Seed Vigor**—Kenneth W. Helm, Nancy S. Petersen, and Rollin H. Abernethy*

606 **Thermal Damage to Chloroplast Envelope Membranes**—Douglas C. McCain*, Judith Croxdale, and John L. Markley

657 **Photophosphorylation after Chilling in the Light. Effects on Membrane Energization and Coupling Factor Activity**—Robert R. Wise and Donald R. Ort*

697 **Effects of Compounds Affecting Calcium Channels on Phytochrome- and Blue Pigment-Mediated Pulvinar Movements of *Cassia fasciculata***—Gabriel Roblin*, Pierrette Fleurat-Lessard, and Janine Bonmort

728 **Reduced Accumulation of ABA during Water Stress in a Molybdenum Cofactor Mutant of Barley**—M. Walker-Simmons*, David A. Kudrna, and Robert L. Warner

742 **Assay and Electrophoresis of Superoxide Dismutase from Red Spruce (*Picea rubens* Sarg.), Loblolly Pine (*Pinus taeda* L.), and Scotch Pine (*Pinus sylvestris* L.). A Method for Biomonitoring**—Norman E. Tandy, Richard T. Di Giulio*, and Curtis J. Richardson

783 **^{13}C Nuclear Magnetic Resonance Study of Suberized Potato Cell Wall**—Joel R. Garbow, Lisa M. Ferrantello, and Ruth E. Stark*

806 **Studies of the Regulation of Nitrate Influx by Barley Seedlings Using $^{13}NO_3^-$**—M. Yaeesh Siddiqi*, Anthony D. M. Glass, Thomas J. Ruth, and Mala Fernando

814 **Leaf Phosphate Status, Photosynthesis, and Carbon Partitioning in Sugar Beet. I. Changes in Growth, Gas Exchange, and Calvin Cycle Enzymes**—I. Madhusudana Rao and Norman Terry*

820 **Leaf Phosphate Status, Photosynthesis and Carbon Partitioning in Sugar Beet. II. Diurnal Changes in Sugar Phosphates, Adenylates, and Nicotinamide Nucleotides**—I. Madhusudana Rao, A. Raviraj Arulanantham, and Norman Terry*

860 **Induction of Alcohol Dehydrogenase and Lactate Dehydrogenase in Hypoxically Induced Barley**—Allen G. Good* and William L. Crosby

881 **Light Response of CO_2 Assimilation, Dissipation of Excess Excitation Energy, and Zeaxanthin Content of Sun and Shade Leaves**—Barbara Demmig-Adams*, Klaus Winter, Almuth Krüger, and Franz-Christian Czygan

887 **Zeaxanthin and the Induction and Relaxation Kinetics of the Dissipation of Excess Excitation Energy in Leaves in 2% O_2, 0% CO_2**—Barbara Demmig-Adams*, Klaus Winter, Almuth Krüger, and Franz-Christian Czygan

894 **Zeaxanthin Synthesis, Energy Dissipation, and Photoprotection of Photosystem II at Chilling Temperatures**—Barbara Demmig-Adams*, Klaus Winter, Almuth Krüger, and Franz-Christian Czygan

939 **Two Modes of Rubidium Uptake in Sunflower Plants**—Manuel Benlloch*, Inés Moreno, and Alonso Rodriguez-Navarro

948 **Crassulacean Acid Metabolism and Photochemical Efficiency of Photosystem II in the Adaxial and Abaxial Parts of the Succulent Leaves of *Kalanchoë daigremontiana* Grown at Four Photon Flux Densities**—Klaus Winter* and Gabriele Awender

955 **Lipid Composition of Plasma Membranes and Endomembranes Prepared from Roots of Barley (*Hordeum vulgare* L.). Effects of Salt**—Dennis J. Brown* and Frances M. DuPont

988 **Putrescine-Induced Wounding and Its Effects on Membrane Integrity and Ion Transport Processes in Roots of Intact Corn Seedlings**—Joseph M. DiTomaso, Jon E. Shaff, and Leon V. Kochian*

1022 **Environmental Effects on Photorespiration of C_3-C_4 Species. I. Influence of CO_2 and O_2 during Growth on Photorespiratory Characteristics and Leaf Anatomy**—George T. Byrd and R. Harold Brown*

1041 **Enhancement of Thermal Injury to Photosynthesis in Wheat Plants and Thylakoids by High Light Intensity**—Kassim Al-Khatib and Gary M. Paulsen*

1049 **Chilling-Induced Lipid Degradation in Cucumber (*Cucumis sativa* L. cv Hybrid C) Fruit**—Kirk L. Parkin* and Shu-Jung Kuo

1088 **Plasma Membrane ATPase Activity following Reversible and Irreversible Freezing Injury**—S. Iswari and Jiwan P. Palta*

1102 **Salt Stress-Induced Cytoplasmic Acidification and Vacuolar Alkalization in *Nitellopsis obtusa* Cells. *In Vivo* ^{31}P-Nuclear Magnetic Resonance Study**—Maki Katsuhara*, Kazuyuki Kuchitsu, Kazuhiko Takeshige, and Masashi Tazawa

1121 **Relationship between Thermal Transitions and Freezing Injury in Pea and Soybean Seeds**—Christina W. Vertucci

1134 **Enhanced Thermal Tolerance of Photosynthesis and Altered Chloroplast Ultrastructure in a Mutant of *Arabidopsis* Deficient in Lipid Desaturation**—Suzanne Hugly, Ljerka Kunst, John Browse, and Chris Somerville*

1156 **Characterization of the Heat Shock Response in Cultured Sugarcane Cells. I. Physiology of the Heat Shock Response and Heat Shock Protein Synthesis**—Stefan Moisyadi and H. Michael Harrington*

1163 **Ozone Concentration in Leaf Intercellular Air Spaces Is Close to Zero**—Agu Laisk*, Olevi Kull, and Heino Moldau

1175 **Protoporphyrin IX Content Correlates with Activity of Photobleaching Herbicides**—Jose M. Becerril and Stephen O. Duke*

1189 **Composition and Structure of Starch from Taproots of Contrasting Genotypes of *Medicago sativa* L.**—Jerry J. Fankhauser, Jr., Jeffrey J. Volenec*, and Geoffrey A. Brown

1233 **Topography of Photosynthetic Activity of Leaves Obtained from Video Images of Chlorophyll Fluorescence**—Paul F. Daley*, Klaus Raschke, J. Timothy Ball, and Joseph A. Berry

1243 **A Unique Phenotype in Heterozygotes of the Auxin-Insensitive Mutant of Tomato, *diageotropica***—Virginia M. Ursin and Kent J. Bradford*

1267 **Lethal Hydroxyl Radical Production in Paraquat Treated Plants**—Charles F. Babbs*, Jo Ann Pham, and Ronald C. Coolbaugh

1271 **Salinity Stress Increases Cytoplasmic Ca Activity in Maize Root Protoplasts**—Jonathan Lynch, Vito S. Polito*, and André Läuchli

1298 **Thermal Regulation of Phosphoenolpyruvate Carboxylase and Ribulose-1,5-Bisphosphate Carboxylase in C_3 and C_4 Plants Native to Hot and Temperate Climates**—Sibdas Ghosh, Shimon Gepstein, Bernard R. Glick, John J. Heikkila, and Erwin B. Dumbroff*

1305 **Anaerobic Induction of Alanine Aminotransferase in Barley Root Tissue**—Allen G. Good* and William L. Crosby

1329 **Circadian Stomatal Rhythms in Epidermal Peels from *Vicia faba***—Holly L. Gorton*, William E. Williams, Mary Elizabeth Binns, Craig N. Gemmell, Ellen A. Leheny, and Andrew C. Shepherd

1365 **Influence of Cadmium on Water Relations, Stomatal Resistance, and Abscisic Acid Content in Expanding Bean Leaves**—Charlotte Poschenrieder, Benet Gunsé, and Juan Barceló*

1408 **Gas-Exchange Properties of Salt-Stressed Olive (*Olea europea* L.) Leaves**—Guido Bongi and Francesco Loreto*

1417 **More Manganese Accumulates in Maple Sun Leaves than in Shade Leaves**—Douglas C. McCain and John L. Markley*

1440 **Maintenance of Low Cl^- Concentrations in Mesophyll Cells of Leaf Blades of Barley Seedlings Exposed to Salt Stress**—Cheng X. Huang* and Reinhard F. M. Van Steveninck

1444 **A Comparison of the Effect of Salt on Polypeptides and Translatable mRNAs in Roots of a Salt-Tolerant and a Salt-Sensitive Cultivar of Barley**—William J. Hurkman*, Chester S. Fornari, and Charlene K. Tanaka

1465 **Acclimation of Two Tomato Species to High Atmospheric CO_2. I. Sugar and Starch Concentrations**—Serge Yelle, Richard C. Beeson, Jr., Marc J. Trudel, and André Gosselin*

1473 **Acclimation of Two Tomato Species to High Atmospheric CO_2. II. Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase and Phospo*enol*pyruvate Carboxylase**—Serge Yelle, Richard C. Beeson, Jr., Marc J. Trudel, and André Gosselin*

1478 **Effects of Cooling Rate on Seeds Exposed to Liquid Nitrogen Temperatures**—Christina W. Vertucci

1492 **Inhibition of Photosystem II Precedes Thylakoid Membrane Lipid Peroxidation in Bisulfite-Treated Leaves of *Phaseolus vulgaris***—P. S. Covello, A. Chang, E. B. Dumbroff, and J. E. Thompson*

1600 **Comparison of Phase Shifts of the Circadian Rhythm of K^+ Uptake in *Lemna gibba* G3 by Various Amino Acid Analogs**—Takao Kondo

1609 **Photoinhibition at Low Temperature in Chilling-Sensitive and -Resistant Plants**—Suzan E. Hetherington*, Jie He, and Robert M. Smillie

DEVELOPMENT AND GROWTH REGULATION

1 **Role of Ethylene Metabolism in *Amaranthus retroflexus***—Ilay Raskin* and Elmo M. Beyer, Jr.

17 **Immunocytolocalization of Polygalacturonase in Ripening Tomato Fruit**—Denise M. Tieman and Avtar K. Handa*

21 **Effect of 2,5-Norbornadiene upon Ethylene Biosynthesis in Midclimacteric Carnation Flowers**—Galen Peiser

85 **Whole Plant and Leaf Steady State Gas Exchange during Ethylene Exposure in *Xanthium strumarium* L.**—Lorna Woodrow, Jirong Jiao, M. James Tsujita, and Bernard Grodzinski*

157 **Endogenous Levels and Transport of 1-Aminocyclopropane-1-Carboxylic Acid in Stamens of *Ipomoea nil* (Convolvulaceae)**—Helen Guiragossian Kiss* and Ross E. Koning

167 **Effect of Alcohols and Their Interaction with Ethylene on the Ripening of Epidermal Pericarp Discs of Tomato Fruit**—Mikal E. Saltveit, Jr.

197 **A Simple Purification of Indole-3-Acetic Acid and Abscisic Acid for GC-SIM-MS Analysis by Microfiltration of Aqueous Samples through Nylon**—James R. Dunlap* and Gene Guinn

202 **pH-Dependence of Extension Growth in *Avena* Coleoptiles and Its Implications for the Mechanism of Auxin Action**—Peter Schopfer

291 **Aryl-Substituted α-Aminooxycarboxylic Acids. A New Class of Auxin Transport Inhibitors**—Gary Gardner* and James R. Sanborn

311 **Control Processes in the Induction and Relief of Thermoinhibition of Lettuce Seed Germination. Actions of Phytochrome and Endogenous Ethylene**—Hargurdeep S. Saini, Evangeline D. Consolacion, Pawan K. Bassi, and Mary S. Spencer*

316 **Changes in Assimilated ^{13}C Distribution and Soluble Acid Invertase Activity of *Zinnia elegans* Induced by Uniconazol, an Inhibitor of Gibberellin Biosynthesis**—Hong-Yul Kim* and Yoshio Suzuki

338 **Senescence-Induced, Thylakoid-Bound Diisopropylfluorophosphate-Binding Protein in Spinach. Induction Pattern, Localization, and Some Properties**—Shinji Kawasaki* and Junko Takeuchi

376 **Influence of Hook Position on Phototropic and Gravitropic Curvature by Etiolated Hypocotyls of *Arabidopsis thaliana***—Jitendra P. Khurana, Thérèse R. Best, and Kenneth L. Poff*

388 **A Fast and Easy Technique for the Isolation of Aleu-**

rone Layers—Pushpalatha P. N. Murthy
398 **Quantitation of Indoleacetic Acid Conjugates in Bean Seeds by Direct Tissue Hydrolysis**—Krystyna Bialek and Jerry D. Cohen*
406 **Maturation in Larch. I. Effect of Age on Shoot Growth, Foliar Characteristics, and DNA Methylation**—Michael S. Greenwood*, C. A. Hopper, and K. W. Hutchison
434 **An Improved Method for Analysis of Polyamines in Plant Tissue by Precolumn Derivatization with *o*-Phthalaldehyde and Separation by High Peformance Liquid Chromatography**—James L. Corbin, Barry H. Marsh, and Gerald A. Peters*
440 **Inhibition of Acid-Enhanced Elongation of *Zea mays* Root Segments by Galactose**—Eiichi Tanimoto, Tom K. Scott*, and Yoshio Masuda
445 **Immunoaffinity Techniques Applied to the Purification of Gibberellins from Plant Extracts**—Richard C. Durley*, C. Ray Sharp, Sonia L. Makj, Mark L. Brenner, and Michael G. Carnes
463 ***In Vivo* Inhibition of Seed Development and Reserve Protein Accumulation in Recombinants of Abscisic Acid Biosynthesis and Responsiveness Mutants in *Arabidopsis thaliana***—Maarten Koornneef*, Corrie J. Hanhart, Henk W. M. Hilhorst, and Cees M. Karssen
643 **Seed Dormancy and Responses of Caryopses, Embryos, and Calli to Abscisic Acid in Wheat**—C. F. Morris, J. M. Moffatt, R. G. Sears, and G. M. Paulsen*
702 **Developing Seeds of *Ricinus communis* L., When Detached and Maintained in an Atmosphere of High Relative Humidity, Switch to a Germinative Mode without the Requirement for Complete Dessication**—Allison R. Kermode and J. Derek Bewley*
708 **Growth Patterns Inferred from Anatomical Records. Empirical Tests Using Longisections of Roots of *Zea mays* L.**—Wendy Kuhn Silk*, Elizabeth M. Lord, and Kathleen J. Eckard
854 **Effect of Temperature on Gibberellin (GA) Responsiveness and on Endogenous GA_1 Content of Tall and Dwarf Wheat Genotypes**—Moshe J. Pinthus*, Michael D. Gale, Nigel E. J. Appleford, and John R. Lenton
876 **Hormones and Pod Development in Oilseed Rape (*Brassica napus*)**—Pierre de Bouille*, Bruno Sotta, Emile Miginiac, and André Merrien
907 **Hormone Levels and Apical Dominance in the Aquatic Fern. *Marsilea drummondii* A.Br.**—Gilles Pilate, Lucienne Sossountzov*, and Emile Miginiac
921 **Interruption of Somatic Embryogenesis in *Daucus carota* L. by 5-Bromodeoxyuridine**—John C. Thomas*, Craig Nessler, and Frank Katterman
972 **Developmental Control of Apiogalacturonan Biosynthesis and UDP-Apiose Production in a Duckweed**—Jane M. Longland, Stephen C. Fry*, and Anthony J. Trewavas
1108 **Role of Calcium in Phytochrome-Controlled Nyctinastic Movements of *Albizzia lophantha* Leaflets**—Luisa Moysset* and Esther Simon
1148 **An Immunological Approach to Gibberellin Purification and Quantification**—Valerie A. Smith* and Jake MacMillan
1201 **Growth Rates and Assimilate Partitioning in the Elongation Zone of Tall Fescue Leaf Blades at High and Low Irradiance**—Hans Schnyder and Curtis J. Nelson*
1262 **Regulation of Protein Synthesis during Photomorphogenesis of Gametophytes of the Fern *Onoclea sensibilis***—Kanjana Chansa-Ngavej and V. Raghavan*
1293 **Inhibitory Effect of Gabaculine on 5-Aminolevulinate Dehydratase Activity in Radish Seedlings**—Simo J. Tchuinmogne, Claude Huault, Abdelkader Aoues, and Alain P. Balangé*
1335 **Gibberellic Acid Stimulation of Cucumber Hypocotyl Elongation. Effects on Growth, Turgor, Osmotic Pressure, and Cell Wall Properties**—Anne Taylor and Daniel J. Cosgrove*
1341 **Auxin and Ethylene Regulation of Petiole Epinasty in Two Developmental Mutants of Tomato, *diageotropica* and *Epinastic***—Virginia M. Ursin and Kent J. Bradford*
1353 **β-D-Glucan Antibodies Inhibit Auxin-Induced Cell Elongation and Changes in the Cell Wall of *Zea* Coleoptile Segments**—Takayuki Hoson and Donald J. Nevins*
1387 **Characterization of a Soybean Leaf Protein That Is Related to the Seed Lectin and Is Increased with Pod Removal**—Steven R. Spilatro and James Michael Anderson*
1616 **Endopeptidases in the Stroma and Thylakoids of Pea Chloroplasts**—Janet E. Musgrove, Peter D. Elderfield, and Colin Robinson*

CELLULAR AND STRUCTURAL BIOLOGY

9 **Isolation of Fixed and Viable Eggs, Central Cells, and Embryo Sacs from Ovules of *Plumbago zeylanica***—Bing-Quan Huang and Scott D. Russell*
117 **Properties of a Chloroplast Enzyme that Cleaves the Chlorophyll *a/b* Binding Protein Precursor. Optimization of an Organelle-Free Reaction**—Mark S. Abad, Steven E. Clark, and Gayle K. Lamppa*
482 **A Comparison between Quin-2 and Aequorin as Indicators of Cytoplasmic Calcium Levels in Higher Plant Cell Protoplasts**—Simon Gilroy*, Will A. Hughes, and Anthony J. Trewavas
1143 **Symplastic Transport of Carboxyfluorescein in Staminal Hairs of *Setcreasea purpurea* Is Diffusive and Includes Loss to the Vacuole**—Joseph E. Tucker, David Mauzerall, and Edward B. Tucker*
1182 **Characterization of a Xylose-Specific Antiserum That Reacts with the Complex Asparagine-Linked Glycans of Extracellular and Vacuolar Glycoproteins**—Michel Laurière, Christiane Laurière, Maarten J. Chrispeels*, Kenneth D. Johnson, and Arnd Sturm
1382 **Isolation of Guard Cell Protoplasts from Mechanically Prepared Epidermis of *Vicia faba* Leaves**—Tamara Kruse, Gary Tallman*, and Eduardo Zeiger

MICROBE-PLANT INTERACTIONS

25 **Effects of Singlet Oxygen Quenchers and pH on the Bacterially Induced Hypersensitive Reaction in Tobacco Suspension Cell Cultures**—Janet L. Salzwedel, Margaret E. Daub*, and Jeng-sheng Huang

33 **Cyanogenesis Inhibits Active Defense Reactions in Plants**—Reinhard Lieberei*, Böle Biehl, Anette Giesemann, and Nilton T V. Junqueira

109 **Rapid Stimulation of an Oxidative Burst during Elicitation of Cultured Plant Cells. Role in Defense and Signal Transduction**—Izydor Apostol, Peter F. Heinstein, and Philip S. Low*

180 **Use of a Root Tumorigenesis Assay to Detect Genotypic Variation in Susceptibility of Thirty-four Cultivars of *Pisum sativum* to Crown Gall**—Martha C. Hawes*, Steven L. Robbs, and Steven G. Pueppke

208 **Host-Pathogen Interactions. XXXII. A Fungal Glucan Preparation Protects Nicotianae against Infection by Viruses**—Marguerite Kopp, Jacques Rouster, Bernard Fritig, Alan Darvill, and Peter Albersheim*

351 **Purification and Characterization of NADH-Glutamate Synthase from Alfalfa Root Nodules**—Michael P. Anderson, Carroll P. Vance*, Gary H. Heichel, and Susan S. Miller

452 **Leghemoglobin in Lupin Plants (*Lupinus albus* cv Multolupa)**—Amparo Vivo*, José Manuel Andreu, Sonsoles de la Viña, and Maria Rosario de Felipe

542 **Host-Pathogen Interactions. XXXIII. A Plant Protein Converts a Fungal Pathogenesis Factor into an Elicitor of Plant Defense Responses**—Felice Cervone, Michael G. Hahn, Giulia De Lorenzo, Alan Darvill, and Peter Albersheim*

553 **Cytochrome Mutants of *Bradyrhizobium* Induced by Transposon Tn5**—Chandra S. Nautiyal, Peter van Berkum, Michael J. Sadowsky, and Donald L. Keister*

779 **Estimation of Ammonium Concentration in the Cytosol of Soybean Nodules**—John G. Streeter

867 **Electrolyte Leakage, Lipoxygenase, and Lipid Peroxidation Induced in Tomato Leaf Tissue by Specific and Nonspecific Elicitors from *Cladosporium fulvum***—Tobin L. Peever and Verna J. Higgins*

982 **Electrogenic ATPase Activity on the Peribacteroid Membrane of Soybean (*Glycine max* L.) Root Nodules**—Michael K. Udvardi* and David A. Day

1065 **Induction of Proteinase Inhibitors in Tobacco Cell Suspension Culture by Elicitors of *Phytophthora parasitica* var. *nicotianae***—Martina Rickauer, Joëlle Fournier, and Marie-Thérèse Esquerré-Tugay

1347 **Lack of Systemic Suppression of Nodulation in Split Root Systems of Supernodulating Soybean (*Glycine max* [L.] Merr.) Mutants**—Jane E. Olsson, Patricia Nakao, B. Ben Bohlool, and Peter M. Gresshoff*

1644 **Nitrogen Nutrition of Nodules in Relation to 'N-Hunger' in Cowpea (*Vigna unguiculata* L. Walp)**—Craig A. Atkins*, John S. Pate, Paul J. Sanford, Felix D. Dakora, and Ian Matthews

MEMBRANES AND BIOENERGETICS

6 **Evidence for the Uptake of Sucrose Intact into Sugarcane Internodes**—Sarah E. Lingle

59 **Tetrazolium Reduction by Guard Cells in Abaxial Epidermis of *Vicia faba*: Blue Light Stimulation of a Plasmalemma Redox System**—T. Vani and A. S. Raghavendra*

133 **Fusicoccin Binding to Its Plasma Membrane Receptor and the Activation of the Plasma Membrane H^+-ATPase. I. Characteristics and Intracellular Localization of the Fusicoccin Receptor in Microsomes from Radish Seedlings**—Maria Ida De Michelis, Maria Chiara Pugliarello, and Franca Rasi-Caldogno*

151 **Iron-Stress Induced Redox Activity in Tomato (*Lycopersicum esculentum* Mill.) Is Localized on the Plasma Membrane**—Thomas J. Buckhout*, Paul F. Bell, Douglas G. Luster, and Rufus L. Chaney

246 **A Simple Apparatus for Screening Absolute Photosynthetic Rates of Single Algal Colonies in an Anoxic Atmosphere**—D. A. Graves and E. Greenbaum*

280 **Influence of Boron on the Membrane Potential in *Elodea densa* and *Helianthus annuus* Roots and H^+ Extrusion of Suspension Cultured *Daucus carota* Cells**—Jürgen Blaser-Grill, Dietmar Knoppik, Anton Amberger, and Heiner Goldbach*

372 **Immunodetection of the Ferredoxin-$NADP^+$ Oxidoreductase-Binding Protein Complex in Thylakoids of Different Higher Plant Species**—Fernando C. Soncini and Rubén H. Vallejos*

394 **Change in Target Molecular Size of the Red Beet Plasma Membrane ATPase during Solubilization and Reconstitution**—Donald P. Briskin* and Ingrid Reynolds-Niesman

475 **Purification and Characterization of Tonoplast ATPase from Etiolated Mung Bean Seedlings**—May Yun Wang, Ya Hui Lin, Wing Ming Chou, Tsuey Ping Chung, and Rong Long Pan*

492 **Identification and Partial Characterization of the Denaturation Transition of the Light Harvesting Complex II of Spinach Chloroplast Membranes**—Karen A. Smith, Barbara K. Ardelt, Norman P. A. Huner, Mariana Krol, Elizabeth Myscich, and Philip S. Low*

575 **Identification and Partial Characterization of the Denaturation Transition of the Photosystem II Reaction Center of Spinach Chloroplast Membranes**—Karen A. Smith and Philip S. Low*

591 **Cyclopropyl Sterol and Phospholipid Composition of Membrane Fractions from Maize Roots Treated with Fenpropimorph**—Anne Grandmougin, Pierrette Bouvier-Navé, Pascaline Ullmann, Pierre Benveniste, and Marie-Andrée Hartmann*

617 **Spectral Properties and Composition of Reaction Center and Ancillary Polypeptide Complexes of Photosystem II Deficient Mutants of *Synechocystis* 6803**—Valdis A. Dzelzkalns and Lawrence Bogorad*

749 **Effects of Extracellular pH on UV-Induced K^+ Efflux from Cultured Rose Cells**—Alfredo J. Huerta* and

Terence M. Murphy

765 **Inactive Photosystem II Complexes in Leaves. Turnover Rate and Quantitation**—Roger A. Chylla and John Whitmarsh*

846 **Altered Chloroplast Structure and Function in a Mutant of *Arabidopsis* Deficient in Plastid Glycerol-3-Phosphate Acyltransferase Activity**—Ljerka Kunst, John Browse, and Chris Somerville*

913 **The Proton Electrochemical Transmembrane Gradients Generated by the Transfer Cells of the Haustorium of *Polytrichum formosum* and Their Use in the Uptake of Amino Acids**—Sylvie Renault, Chantal Despeghel-Caussin, Jean-Louis Bonnemain*, and Serge Delrot

928 **An Analysis of the Control of Phosphorylation-Coupled Respiration in Isolated Plant Mitochondria**—Anna C. Padovan, Ian B. Dry, and Joseph T. Wiskich*

934 **Target Molecular Size and Sodium Dodecyl Sulfate-Polyacrylamide Gel Electrophoresis Analysis of the ATP- and Pyrophosphate-Dependent Proton Pumps from Maize Root Tonoplast**—Alain Chanson and Paul-Emile Pilet*

1009 **Lysophosphatidylcholine Stimulates ATP Dependent Proton Accumulation in Isolated Oat Root Plasma Membrane Vesicles**—Michael Gjedde Palmgren* and Marianne Sommarin

1029 **Relationship between the Quantum Efficiencies of Photosystems I and II in Pea Leaves**—Jeremy Harbinson*, Bernard Genty, and Neil R. Baker

1035 **^{14}C Fixation by Leaves and Leaf Cell Protoplasts of the Submerged Aquatic Angiosperm *Potamogeton lucens*: Carbon Dioxide or Bicarbonate?**—Marten Staal, J. Theo M. Elzenga, and Hidde B. A. Prins*

1077 ***b*-Type Cytochromes in Higher Plant Plasma Membranes**—Han Asard*, Mireille Venken, Roland Caubergs, Willem Reijnders, Fred L. Oltmann, and Jan A. De Greef

1115 **Phosphatidylinositol 4,5-Bisphosphate Phospholipase C and Phosphomonoesterase in *Dunaliella salina* Membranes**—Kregg J. Einspahr, Thomas C. Peeler, and Guy A. Thompson, Jr.*

1207 **Comparison of the Lipid Composition of Oat Root and Coleoptile Plasma Membranes. Lack of Short-Term Change in Response to Auxin**—Richard P. Sandstrom and Robert E. Cleland*

1249 **Sulfide-Resistant Respiration in Leaves of *Elodea canadensis* Michx. Comparison with Cyanide-Resistant Respiration**—Joaquim Azcón-Bieto*, Miquel Ribas-Carbó, Miquel A. González-Meler, and Josep Peñuelas

1322 **Partitioning of Noncyclic Photosynthetic Electron Transport to O_2-Dependent Dissipative Processes as Probed by Fluorescence and CO_2 Exchange**—Richard B. Peterson

1429 **Identification and Characterization of the Ca^{2+}-ATPase which Drives Active Transport of Ca^{2+} at the Plasma Membrane of Radish Seedlings**—Franca Rasi-Caldogno*, Maria Chiara Pugliarello, Claudio Olivari, and Maria Ida De Michelis

1513 **Intact Chloroplasts Show Ca^{2+}-Gated Switching between Localized and Delocalized Proton Gradient Energy Coupling (ATP Formation)**—Gisela G. Chiang and Richard A. Dilley*

1524 **Selective Delipidation of the Plasma Membrane by Surfactants. Enrichment of Sterols and Activation of ATPase**—Richard P. Sandstrom and Robert E. Cleland*

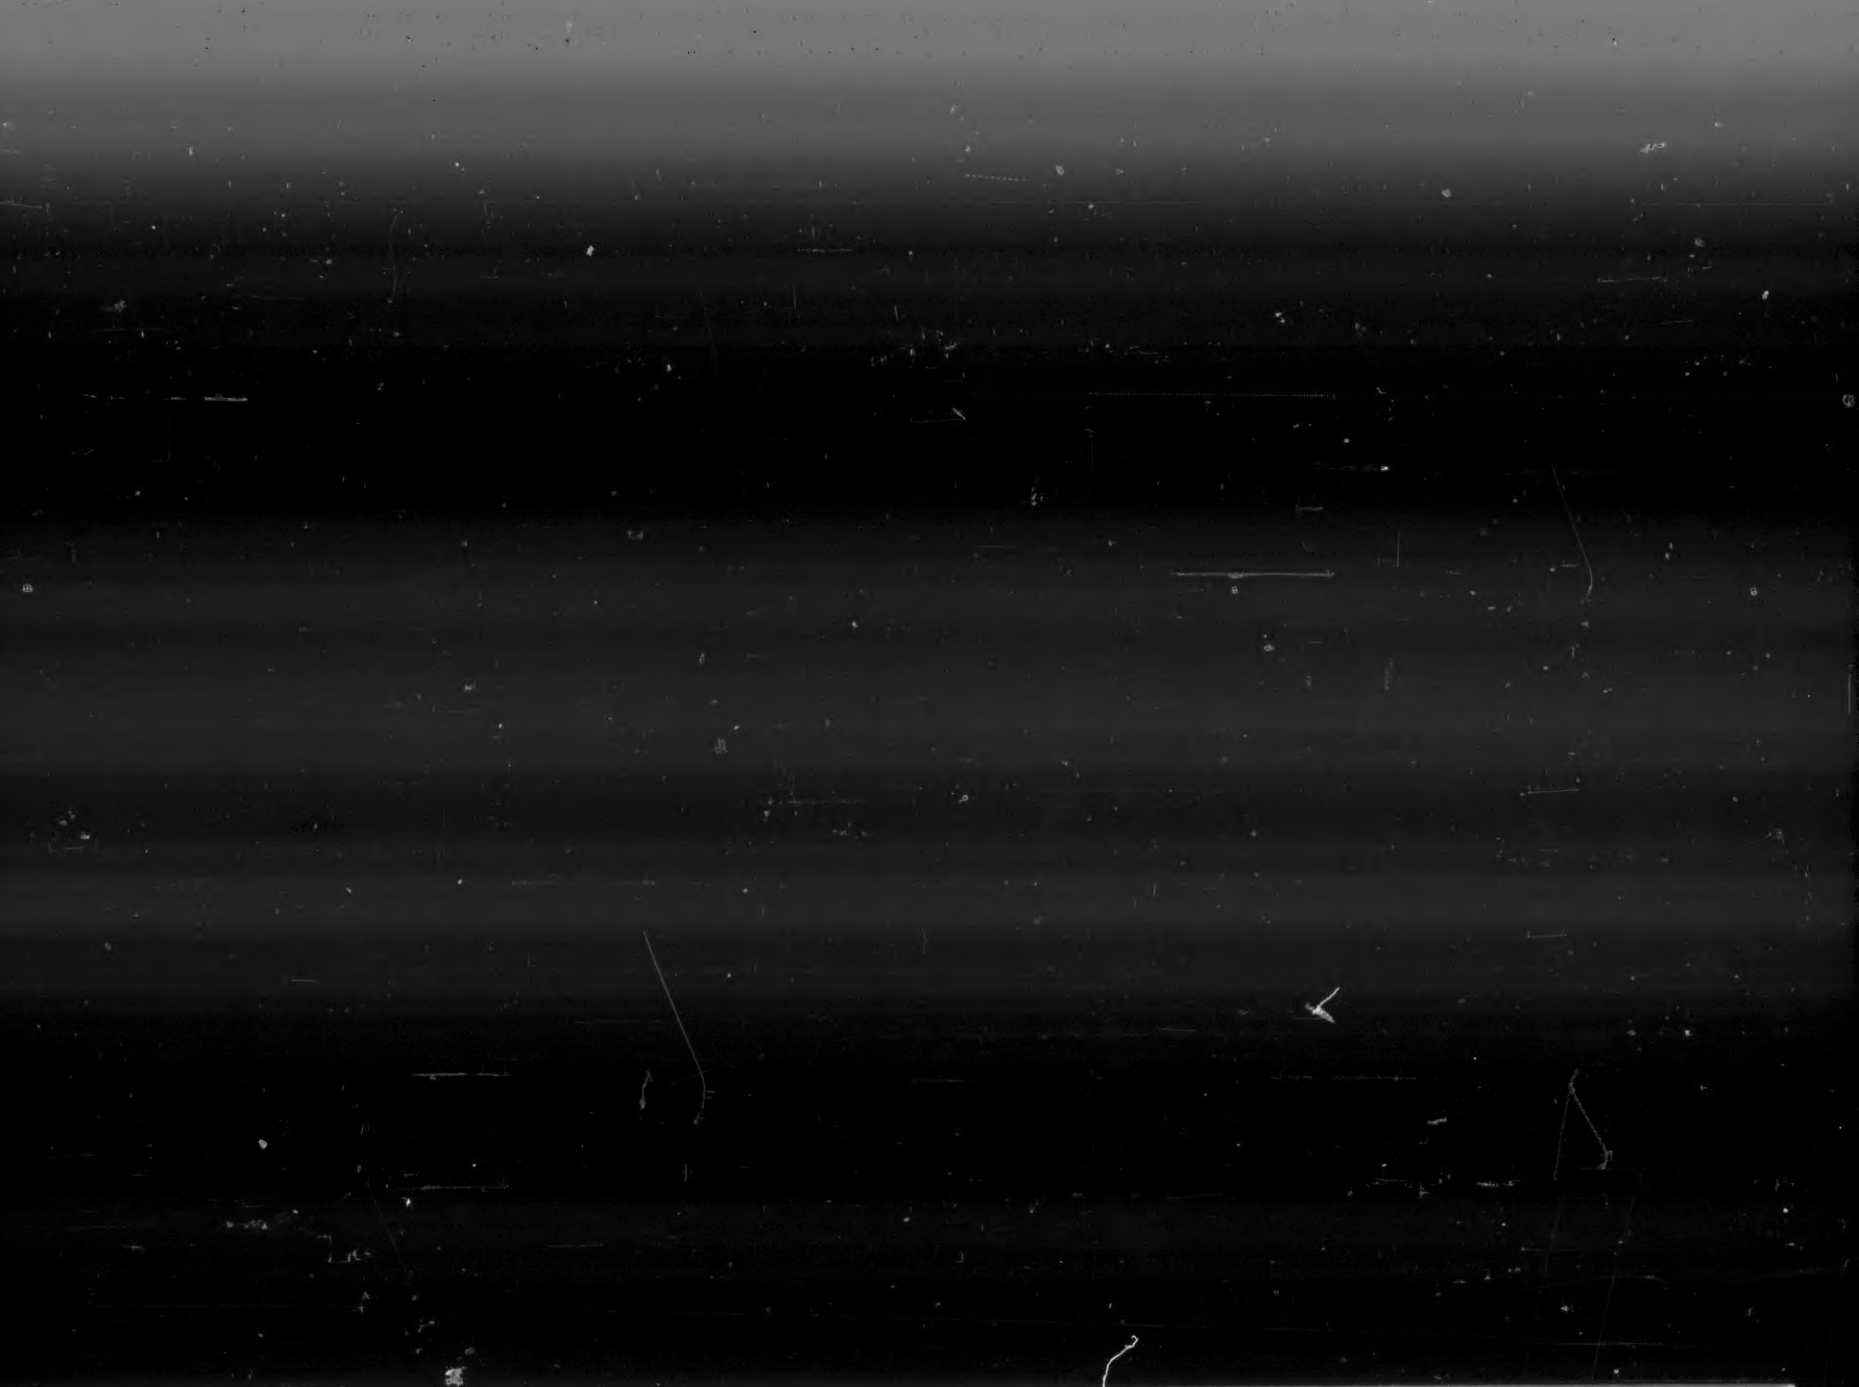
1532 **Uptake of Acidic and Basic Sugar Derivatives in *Lemna gibba* G1**—Amparo Sanz* and Cornelia I. Eberius

1636 **Characterization of the Effects of Divalent Cations on the Coupled Activities of the H^+-ATPase in Tonoplast Vesicles**—Shu-I Tu*, Edwin Nungesser, and David Brauer

NATURAL PRODUCTS

45 **Identification of Gibberellins A_1, A_3, and Iso-A_3 in Cultures of *Azospirillum lipoferum***—Rubén Bottini, Mónica Fulchieri, David Pearce, and Richard P. Pharis*

1552 **Biosynthesis of the Cyanogenic Glucoside Dhurrin in Seedlings of *Sorghum bicolor* (L.) Moench and Partial Purification of the Enzyme System Involved**—Barbara Ann Halkier and Birger Lindberg Møller*



Plant Physiol. (1989) 90, xxix–xxxii

Subject Index

A

Abscisic acid
  biosynthesis, seed development, *Arabidopsis thaliana*, 463
  reduced accumulation, water stress, molybdenum cofactor barley mutant, 728
  regulation of expression, osmotin molecular cloning, tobacco, 1096
  responses, seed dormancy, wheat, 643
  simple purification, GC-SIM-MS analysis, 197
Abutilon theophrasti (*see* Velvetleaf)
Acer platanoides (*see* Maple)
Acetate, photoevolution of H_2, enzyme localization, *Chlamydomonas reinhardtii*, 788
Acid, vacuolar, hydrolysis and sucrose breakdown, lime, 530
Acidification, inhibition of elongation by galactose, corn root segments, 440
Acifluorfen, protoporphyrin IX content and photobleaching, cucumber, redroot pigweed and velvetleaf, 1175
Acifluorfen-methyl, inhibition of protoporphyrinogen oxidase, cucumber, 1239
Adenosine triphosphatase
  peribacteroid membrane, electrogenic activity, soybean root nodules, 982
  plasma membrane
    active calcium transport, radish seedlings, 1429
    freezing injury, potato, 1088
    target molecular size and solubilization, red beet, 394
    selective delipidation by surfactants, oat, 1524
  tonoplast from etiolated mung bean seedlings, purification, characterization, 475
Adenosine triphosphate
  calcium gating of proton fluxes, intact pea chloroplasts, 1513
  Calvin-Benson cycle enzymes, guard cell protoplasts, broad bean, 1057
  -dependent proton accumulation, lysophosphatidylcholine, oat root plasma membrane vesicles, 1009
  diacylglycerol kinase, *Catharanthus roseus* suspension-cultured cells, 1546
  proton pump in maize root, target molecular size, 934
S-Adenosylmethionine, synthesis of methylated ethanolamine moieties, *Lemna paucicostata*, 296
Adenylate, leaf phosphate status, carbon partitioning, sugar beet, 820
Aequorin, cytoplasmic calcium levels, higher plant cell protoplasts, 482
Aging, maturation in larch, 406
Alanine aminotransferase, anaerobic induction, barley root tissue, 1305
Albizzia lophantha, leaflets, calcium role, phytochrome-controlled nyctinastic movements, 1108
Alcohol, interaction with ethylene, epidermal pericarp disc ripening, tomato fruit, 167
Alcohol dehydrogenase
  anaerobic induction of alanine aminotransferase, barley root tissue, 1305
  induction, lactate dehydrogenase, hypoxically induced barley, 860
Aldehyde oxidase, molybdenum cofactor, abscisic acid accumulation during water stress, barley mutant, 728
Aleurone layers, barley, fast and easy isolation technique, 388
Alfalfa
  contrasting genotypes, structure, starch from taproots, 1189
  root nodules
    aspartate aminotransferase, 1622
    purification, NADH-glutamate synthase, 351
Algae
  Chlamydomonas reinhardtii
    procedures, generation of mature zygotes, 512
    screening absolute photosynthetic rates, single colonies, 246
  Chlorella pyrenoidosa, metabolism, fatty acid hydroperoxides, 125
  Cyanidium caldarium, enzyme subcellular distribution, glycolate metabolism, 799
  Dunaliella salina, fatty acid acylated proteins, 549
  Fremyella diplosiphon, protein synthesis, phycobiliprotein mRNA regulation, 1486
  prasinophyceae, compartmentation, peroxisomal enzymes, 754
  Ulva lactuca, cell wall-associated calcium-phosphates, ^{31}P NMR studies, 230
Amaranthus retroflexus (*see* Pigweed)
Amaranthus viridis, ferredoxin-$NADP^+$ oxidoreductase-binding protein complex, immunodetection, 372
Amino acids
  analogs, circadian rhythm phase shifts, potassium uptake by *Lemna gibba*, 1600
  aspartokinase, *Lemna paucicostata*, 1577, 1584
  transmembrane proton gradients, transfer cells, *Polystrichum formosum*, 913
α-Aminocarboxylic acids, aryl-substituted, corn coleoptiles, 291
1-Aminocyclopropane-1-carboxylate, effect of 2,5-norbornadiene, ethylene biosynthesis, midclimacteric carnation flowers, 21
1-Aminocyclopropane-1-carboxylic acid, endogenous levels and transport, stamens, *Ipomoea nil*, 157
5-Aminolevulinate dehydratase, inhibitory effect of gabaculine, radish seedlings, 1293
5-Aminolevulinic acid, regulation of synthesis, developing chloroplasts, cucumber, 996, 1003
Ammonium, concentration in cytosol, estimation, soybean nodules, 779
Ananas comosus (*see* Pineapple)
Andropogon glomeratus, leaf carbon isotope discrimination, salt and water stress, 162
Anoxia, anaerobic succinate-lactate production, cellular pH, various plants, 29
Apiogalacturonan, developmental control of biosynthesis, UDP-apiose production, duckweed, 972
Arabidopsis thaliana
  desaturation of palmitic acid, leaf lipids, 943
  enhanced thermal tolerance, lipid desaturation deficiency, 1134
  etiolated hypocotyls, hook position, gravitropic curvature, 376
  locus mutation, resistance, isoxaben, 146
  mutant, deficiency, chloroplast 16:1/18:1 desaturase, 522
  plastid glycerol-3-phosphate acyltransferase activity, altered chloroplast structure, 846
  seed development, abscisic acid biosynthesis, 463
Arachis hypogaea (*see* Peanut)
Arginine, metabolism, developing soybean cotyledons, 624, 631
Artichoke, Jerusalem, fructose 2,6-bisphosphate hydrolyzing enzymes, 827
Arylesterase, soluble and bound apoplastic activity, primary leaves, barley and oat, 185
Aspartate aminotransferase, alfalfa root nodules, 1622
Aspartate transcarbamylase, activity in pea ovary, 1565
Aspartokinase, *Lemna paucicostata*, 1577, 1584
Aspen, leaf, isoprene emission, 267
Assays
  electrophoresis of superoxide dismutase, red spruce, loblolly and scotch pine, 742
  immunoaffinity techniques, gibberellin purification, plant extracts, 445
  immunological approach, gibberellin purification and quantification, 1148
  improved method for polyamine analysis, plant tissue, 434
  root tumorigenesis, crown gall susceptibility, pea, 180
Autophosphorylation, protein kinase from pea, 1279
Auxin
  action, pH-dependence of extension growth, oat coleoptiles, 202
  aryl-substituted α-aminocarboxylic acids, corn, 291
  comparison of lipid composition, oat root and coleoptile plasma membranes, 1207
  -induced cell elongation, inhibition by β-D-glucan antibodies, corn coleoptile segments, 1353
  -insensitive tomato mutant, unique phenotype, heterozygotes, 1243
  interruption of somatic embryogenesis, 5-bromodeoxyuridine, carrot, 921

regulation of petiole epinasty, developmental mutants, tomato, 1341
-stimulated growth of excised hypocotyl segments, diacylglycerol levels, soybean, 275
Avena sativa (*see* Oat)
Avocado, cell wall hydrolytic enzymes, low oxygen, 259
Azolla-Anabaena, improved method for polyamine analysis, plant tissue, 434
Azospirillum lipoferum, identification of gibberellins, A_1/A_3/iso-A_3, 45

B

Banana, cell wall enzymes, effect of low oxygen, 251
Barley
anaerobic succinate-lactate production, cellular pH, 29
apoplastic enzyme activity, 185
chilling in light, 1609
cloning of cDNA sequences, calmodulin, 714
cytoplasmic calcium levels, comparison, Quin-2 and Aequorin as indicators, 482
induction, alcohol dehydrogenase, lactate dehydrogenase, 860
isolation of aleurone layers, fast and easy technique, 388
leaf cell development, coordinate expression, rubisco activase and rubisco, 516
light intensity, light-harvesting chlorophyll-protein, 560
root
anaerobic induction, alanine aminotransferase, 1305
lipid composition, plasma membranes and endomembranes, 955
polypeptide changes, salt, 1444
sodium chloride effect, metabolic heat evolution rates, 53
seedling, studies of regulation, nitrate influx, 806
seedling leaf blades, mesophyll cells, low chloride and salt stress, 1440
Bean
bisulfite-treated leaves, photosystem II inhibition, thylakoid membrane lipid peroxidation, 1492
characterization of xylose-specific antiserum, glycoproteins, 1182
chilling in light, 1609
circadian rhythm in expression of mRNA coding, light-harvesting complex, photosystem II, 665
cut-injured roots of sweet potato, cDNA clone, phenylalanine ammonia-lyase, 1403
embryos, conversion of zeatin to dihydrozeatin, enzyme mediation, 1630
germination, cell wall synthesis, per-C-deuterated *myo*-inositol, 686
iron deficiency, rhizosphere acidification, 359
leaf, cadmium influence, water relations, 1365
nodules, isoenzymes, superoxide dismutase, 1286
plasma membranes, *b*-type cytochromes, 1077
seed, quantitation, indoleacetic acid conjugates, 398
sucrolysis characterization, uridine diphosphate, pyrophosphate, 635
synthesis of lectin-like protein, developing cotyledons, 1015
zeatin glycosylation enzymes, 1316
Beet
carbon partitioning, leaf phosphate status, photosynthesis, 814, 820
ferredoxin-$NADP^+$ oxidoreductase-binding protein complex, immunodetection, 372
plasma membrane ATPase, target molecular size, solubilization and reconstitution, 394
Bicarbonate, carbon fixation by leaves, leaf cell protoplasts, *Potamogeton lucens*, 1035
Bisulfite, -treated bean leaves, photosystem II inhibition, thylakoid membrane lipid peroxidation, 1492
Bixin, pH effect, hypersensitive reaction, tobacco, 25
Boron, membrane potential in *Elodea densa*, *Helianthus annuus* root, proton extrusion in carrot, 280
Bradyrhizobium japonicum
cytochrome mutants, induction, transposon Tn*5*, 553
lack of systemic suppression of nodulation, supernodulating soybean mutants, 1347
Brassica napus (*see* Rapeseed)
Brassica nigra
phosphate starvation inducible glycolytic bypasses, 1275
suspension cells, purification, phosphoenolpyruvate phosphatase, 734
Brassica oleracea (*see* Cauliflower)
Brassica rapa (*see* Turnip)
Broad bean
chilling in light, 1609
guard cell protoplasts
Calvin-Benson cycle enzymes, 1057
leaf, mechanically prepared epidermis, 1382
guard cells in abaxial epidermis, tetrazolium reduction, blue light, 59
stomata
circadian rhythms, epidermal peels, 1329
closing with syringomycin, 1435
5-Bromodeoxyuridine, interruption of somatic embryogenesis, carrot, 921

C

Cabbage, red and white, photomorphogenic response comparison, ultraviolet light, 345
Cadmium, influence on water relations, stomatal resistance, expanding bean leaves, 1365
Calcium
-ATPase, active calcium transport at plasma membrane, radish seedlings, 1429
autophosphorylation of protein kinase, pea, 1279
cytoplasmic activity, salinity stress, corn root protoplasts, 1271
cytoplasmic levels, Quin-2 and Aequorin, higher plant cell protoplasts, 482
gating of proton fluxes, intact pea chloroplasts, 1513
-phosphates, cell wall association, *Ulva lactuca*, 230
role in phytochrome-controlled nyctinastic movements, *Albizzia lophantha* leaflets, 1108
Calcium channel, effects of compounds, pulvinar movements, *Cassia fasciculata*, 697
Callus
napiergrass, DNA methylation, embryogenic competence, 37
rice, evaluation of transformation, selectable markers, 217
Calmodulin
autophosphorylation of protein kinase, pea, 1279
cloning of cDNA sequences, barley, 714
Calvin-Benson cycle, enzymes, guard cell protoplasts, broad bean, 1057
Calvin cycle, leaf phosphate status, carbon partitioning, sugar beet, 814
CaMV 35S promoter, differential accumulation of transcript, transgenic tobacco, 1570
C_3 and C_4 plants
environmental effects on photorespiration, 1022
thermal regulation, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, 1298
Capsicum annuum (*see* Pepper)
Carbamoyl phosphate synthetase, activity in pea ovary, 1565
Carbohydrates
reserves for crassulacean acid metabolism, pineapple leaves, 91
stimulation of ethylene production, tobacco leaf discs, 1246
Carbon
$\delta^{13}C$ values in maize leaf, phosphoenolpyruvate carboxylase, 582
dissolved inorganic, photosynthesis adaptation, *Synechococcus leopoliensis*, 720
fixation by leaves and leaf cell protoplasts, *Potamogeton lucens*, 1035
internal pool and carbonic anhydrase activity, correlation, *Synechocystis* PCC 6174, 470
isotope discrimination, salt and water stress, C_4 grasses, 162
partitioning, leaf phosphate status, sugar beet, 814, 820
sources of export, spinach leaves, 1168
Carbon-11, rhizophere acidification, iron deficient bean plants, 359
Carbon-13
distribution, invertase and growth retardation, zinnia, 316
nuclear magnetic resonance study, suberized potato cell wall, 783
Carbon dioxide
adaptation to limitation, high-CO_2-requiring mutants, *Chlamydomonas reinhardtii*, 1195
gas-exchange properties, salt-stressed olive leaves, 1408
high atmospheric, acclimation, two tomato species, 1465, 1473
noncyclic photosynthetic electron transport, partitioning, tobacco, 1322
study of active transport, use of carbon oxysulfide, *Synechococcus* UTEX 625, 1221
zeaxanthin and induction and relaxation kinetics, nonphotochemical quenching, 887
Carbonic anhydrase, correlation with inorganic carbon internal pool, *Synecho-*

cystis PCC 6174, 470
Carbon oxysulfide, active carbon dioxide transport, *Synechococcus* UTEX 625, 1221
2-Carboxy-D-arabinitol 1-phosphatase, purification and properties, tobacco, 679
2-Carboxyarabinitol 1-phosphate
degradation by specific chloroplast phosphatase, tobacco, 673
D-hamamelonic acid 2'-phosphate and, identical compounds, 13
Carboxyfluorescein, symplastic transport, *Setcreasea purpurea*, 1143
Carnation
flower petals, senescence-related genes, 690
midclimacteric flowers, 2,5-norbornadiene effect, ethylene biosynthesis, 21
Carrot
characterization of xylose-specific antiserum, glycoproteins, 1182
cytoplasmic calcium levels, comparison, Quin-2 and Aequorin as indicators, 482
interruption of somatic embryogenesis, 5-bromodeoxyuridine, 921
proton extrusion, boron deficiency, *Elodea densa* and *Helianthus annuus*, 280
synthesis of methylated ethanolamine moieties, 306
UDP-glucose:(1,3)-β-glucan synthase, 101
Carthamus tinctorius (*see* Safflower)
Carya ovata (*see* Hickory)
Cassia fasciculata, effects of compounds affecting calcium channels, phytochrome- and blue pigment-mediated pulvinar movements, 697
Castanospermine, effect on myrosinase, cress seedlings, 48
Castor bean
developing seeds, germination, 702
germinating seeds, biosynthesis, lipid transfer proteins, 841
Catalase
compartmentation of peroxisomal enzymes, prasinophyceae, 754
O_2-resistant photosynthesis, tobacco plants, 1457
Catharanthus roseus, suspension-cultured cells, diacylglycerol kinase, 1546
Cauliflower, plasma membranes, *b*-type cytochromes, 1077
Cell wall
-associated calcium-phosphates, ^{31}P NMR studies, *Ulva lactuca*, 230
enzymes, effect of low oxygen, banana, 251
hydrolytic enzymes, low oxygen, avocado, 259
hypocotyl elongation in cucumber, gibberellic acid stimulation, 1335
inhibition of acid-enhanced elongation, galactose, corn root segments, 440
inhibition of cell elongation, β-D-glucan antibodies, corn coleoptile segments, 1353
suberized potato, ^{13}C nuclear magnetic resonance study, 783
sunflower and *Perilla ocymoides*, ozone concentration, intercellular spaces, 1163
synthesis in germinating beans, study use, per-C-deuterated *myo*-inositol, 686
Chenopodium ambrosioides, ferredoxin-$NADP^+$ oxidoreductase-binding protein complex, immunodetection, 372
Chilling
-induced lipid degradation, cucumber, 1049
in light, phosphorylation, cucumber, 657
-sensitive and -resistant plants, photoinhibition, low temperature, 1609
temperature response, fructose 2,6-bisphosphate changes, green pepper, 458
zeaxanthin synthesis and energy dissipation, photoprotection, photosystem II, 894
Chlamydomonas reinhardtii
chloroplastic succinate dehydrogenase, electron transport chains, 1084
high-CO_2-requiring mutants, adaptation, limiting CO_2, 1195
mature zygotes, procedures for generation, 512
photoevolution of H_2, enzyme localization, 788
screening absolute photosynthetic rates, single algal colonies, anoxic atmosphere, 246
Chlorella pyrenoidosa, metabolism of fatty acid hydroperoxides, 125
Chloride
inhibition, nitrate reductase, spinach, 70
low concentrations in mesophyll cells, salt stress, barley seedling leaf blades, 1440
Chlorophyll, fluorescence, topography of photosynthesis, *Xanthium strumarium*, 1233
Chlorophyll *a/b* binding protein, precursor, cleavage, chloroplast enzyme, 117
Chloroplast
altered structure in mutant *Arabidopsis*, plastid glycerol-3-phosphate acyltransferase, 846
Arabidopsis thaliana
deficiency, 16:1/18:1 desaturase, 522
thermal tolerance, lipid desaturation deficiency, 1134
cucumber, regulation, 5-aminolevulinic acid synthesis, 996, 1003
envelope membranes, thermal damage, Norway maple, 606
lanceolate leaflet isoline of soybean, changes in photosynthesis, 773
pea, endopeptidases, stroma and thylakoids, 1616
phosphatase, 2-carboxyarabinitol 1-phosphate degradation, tobacco, 673
processing enzyme, cleavage, chlorophyll *a/b* binding protein precursor in pea, 117
spinach
aerobic and anaerobic respiration, 653
denaturation transition, light harvesting complex II, 492
denaturation transition, photosystem II reaction center, 575
stroma, ferredoxin-dependent choline monooxygenase, 322
succinate dehydrogenase, electron transport chains, *Chlamydomonas reinhardtii*, 1084
Choline
synthesis of ethanolamine moieties, *Lemna paucicostata*, 296
synthesis of methylated ethanolamine moieties, soybean and carrot, 306
Choline monooxygenase, ferredoxin-dependent, spinach chloroplast stroma, 322
Chromatin, differential histone acetylation, growth in sodium chloride, histone acetylation, 237
Chromatography, improved method for polyamine analysis, plant tissue, 434
Circadian rhythm
expression of mRNA coding, light-harvesting complex-II, bean, 665
phase shifts, amino acid analogs, *Lemna gibba* potassium uptake, 1600
stomatal, epidermal peels, broad bean, 1329
Citrus aurantifolia (*see* Lime, Persian)
Citrus limettiodes (*see* Lime, Palestine)
Citrus paradisi (*see* Grapefruit)
Cladosporium fulvum, elicitors, electrolyte leakage, tomato, 867
Coleoptiles
corn, β-D-glucan antibodies, inhibited cell elongation, 1353
oat, pH-dependence, extension growth, 202
root, lipid composition, plasma membrane, 1207
Cooling, rate of, liquid nitrogen temperatures, various seeds, 1478
Copper, toxicity, photosystem II electron transport, pea, 175
Corn
activation of phosphoenolpyruvate carboxylases, glucose-6-phosphate, 648
anaerobic succinate-lactate production, cellular pH, 29
aryl-substituted α-aminocarboxylic acids, 291
cell lines, polyamine synthesis, 1378
chilling in light, 1609
coleoptile segments, inhibition of cell elongation, β-D-glucan antibodies, 1353
effects of divalent cations, H^+-ATPase, tonoplast vesicles, 1636
ferredoxin-$NADP^+$ oxidoreductase-binding protein complex, immunodetection, 372
growth patterns, inferences from anatomical records, 708
kernels and potato tubers, comparison, starch branching enzymes, 75
leaf
cDNA clones, NADH:nitrate reductase, 792
$\delta^{13}C$ values, phosphoenolpyruvate carboxylase, 582
phosphoenolpyruvate carboxylase, 427
leaf carbon isotope discrimination, salt and water stress, 162
mesophyll cells, role of metabolites, light/dark-regulation of dikinase, 330
nitrate effects, nitrate reductase activity, mRNA levels, 962
photorespiratory rates, ^{18}O-labeling, 500
red light-induced accumulation, ubiquitin-phytochrome conjugates, 380
root, cyclopropyl sterol and phospholipid composition, fenpropimorph, 591
root proton pumps, target molecular size, 934
root protoplasts, cytoplasmic calcium activity, salinity stress, 1271
root segments, inhibition of acid-enhanced elongation, galactose, 440
seed, phospholipid transfer protein, maturation and germination, 1560
seedling
heat shock protein synthesis, induction by methomyl, 1256
hydroxamic acid glucosyltransferases, 1071

post-transcriptional control, sucrose synthase, 1359
putrescine-induced wounding, ion transport, 988
thermal regulation, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, 1298
transient accumulation of nitrite reductase mRNA, 1214
Cotyledons
bean, synthesis, lectin-like protein, 1015
developing, arginine metabolism, soybean, 624, 631
Cowpea
nitrogen nutrition of nodules, relation, "N-hunger," 1644
nodules, isoenzymes, superoxide dismutase, 1286
Crambe abysinnica, metabolic fate of fatty acids, different chain lengths, 835
Crassulacean acid metabolism
photochemical efficiency, photosystem II, *Kalanchoë daigremontiana*, 948
soluble sugars as carbohydrate reserve, pineapple leaves, 91
Cress, seedlings, castanospermine effect, myrosinase, 48
Crown gall, susceptibility, root tumorigenesis assay, pea, 180
Cucumber
chilling-induced lipid degradation, 1049
chilling in light, 1609
chloroplasts, regulation, 5-aminolevulinic acid synthesis, 996, 1003
hypocotyl elongation, gibberellic acid stimulation, 1335
inhibition of protoporphyrinogen oxidase, herbicide acifluorfen-methyl, 1239
phosphorylation after chilling in light, 657
photoporphyrin IX content, activity, photobleaching herbicides, 1175
Cucurbita andreana, ferredoxin-NADP$^+$ oxidoreductase-binding protein complex, immunodetection, 372
Cucurbita pepo (*see* Zucchini)
Cuphea wrightii, metabolic fate of fatty acids, different chain lengths, 835
Cyanide, sulfide-resistant respiration, *Elodea canadensis* leaves, 1249
Cyanidium caldarium, subcellular distribution of enzymes, glycolate metabolism, 799
Cyanobacteria
Synechococcus leopoliensis, photosynthesis adaptation, dissolved inorganic carbon, 720
Synechococcus UTEX 625, use of carbon oxysulfide, carbon dioxide transport, 1221
Cyanogenesis, inhibition of active defense reactions, rubber tree, 33
Cyclopropyl sterol, phospholipid composition and, membrane fractions, maize roots, 591
Cytochrome, mutants of *Bradyrhizobium*, induction, transposon Tn5, 553
Cytochrome *b*, higher plant plasma membranes, 1077
Cytochrome *c* oxidase, sulfide-resistant respiration, *Elodea canadensis* leaves, 1249
Cytochrome P-450, monooxygenases, bacterial and plant, antigenic crossreactivity, 534
Cytokinin oxidase, partial purification, wheat, 899
Cytokinins, hormone levels and apical dominance, *Marsilea drummondii*, 907
Cytoplasm, salt stress-induced acidification, vacuolar alkalinization, *Nitellopsis obtusa*, 1102
Cytosol
Calvin-Benson cycle enzymes, guard cell protoplasts, broad bean, 1057
phosphofructokinase, spinach leaves, 1498, 1506
soybean nodules, estimation, ammonium concentration, 779

D

Daucus carota (*see* Carrot)
Deoxyribonucleic acid
induction of cytochrome mutants by transposon Tn5, *Bradyrhizobium*, 553
interruption of somatic embryogenesis, 5-bromodeoxyuridine, carrot, 921
methylation, maturation in larch, 406
methylation and embryogenic competence, leaves and callus, napiergrass, 37
plastid, hypohaploid tobacco plants, 390
Deoxyribonucleic acid, complementary
cloning of sequences encoding calcium-binding protein, calmodulin, barley, 714
NADH:nitrate reductase, corn leaf, 792
phenylalanine ammonia-lyase, cut-injured roots, sweet potato, 1403
Dhurrin, biosynthesis, sorghum seedling, 1552
Diacylglycerol
levels, auxin-stimulated growth, soybean hypocotyl segments, 275
microsomal phosphatidate phosphatase, maturing safflower seeds, 413
Diacylglycerol kinase, *Catharanthus roseus* suspension-cultured cells, 1546
Dianthus caryophyllus (*see* Carnation)
1,4-Diazabicyclo octane, pH effect, hypersensitive reaction, tobacco, 25
Dicots, red light-induced accumulation, ubiquitin-phytochrome conjugates, 380
Dihydroxyacetone phosphate, Calvin-Benson cycle enzymes, guard cell protoplasts, broad bean, 1057
Diisopropylfluorophosphate-binding protein, senescence-induced, spinach, 338
Duckweed
developmental control of apiogalacturonan biosynthesis, UDP-apiose production, 972
paraquat-treated, lethal hydroxyl radical production, 1267
Dunaliella salina
membranes, phosphatidylinositol 4,5-bisphosphate phospholipase C, phosphomonoesterase, 1115
thylakoid pigment protein complexes, radioactive fatty acids, galactolipids, 610

E

Echinochloa crus-galli, anaerobic succinate-lactate production, cellular pH, 29
Eggs, isolation of embryo sacs from ovules, *Plumbago zeylanica*, 9
Electrolytes, leakage, *Cladosporium fulvum* elicitors, tomato leaf tissue, 867
Electrons, transport chains, chloroplastic succinate dehydrogenase, *Chlamydomonas reinhardtii*, 1084
Elicitors
Phytophthora parasitica, proteinase inhibitor induction, tobacco, 1065
rapid stimulation of oxidative burst, soybean, 109
Elodea canadensis, leaf, sulfide-resistant respiration, 1249
Elodea densa, boron deficiency, proton extrusion in carrot, 280
Embryo, bean, conversion of zeatin to dihydrozeatin, enzyme mediation, 1630
Embryogenesis, somatic, interruption by 5-bromodeoxyuridine, carrot, 921
Endopeptidases, stroma and thylakoids, pea chloroplasts, 1616
Endopolygalacturonase, host-pathogen interactions in soybean, 542
Enzymes, glycolytic, phosphate starvation, *Brassica nigra*, 1275
Epidermis
abaxial, tetrazolium reduction, broadbean guard cells, 59
mechanically prepared, guard cell protoplasts, broad bean leaves, 1382
Epinasty, petiole, auxin and ethylene regulation, tomato developmental mutants, 1341
Ethanol, translational regulation, fumarase synthesis, *Euglena*, 63
Ethanolamine
synthesis of methylated moieties
Lemna paucicostata, 296
soybean and carrot, 306
Ethylene
biosynthesis, 2,5-norbornadiene effect, midclimacteric carnation flowers, 21
cell wall hydrolytic enzymes, low oxygen, avocado, 259
control processes of thermoinhibition, lettuce seed germination, 311
effect of low oxygen, cell wall enzymes, banana, 251
exposure, steady state gas exchange, *Xanthium strumarium*, 85
interaction with alcohols, epidermal pericarp disc ripening, tomato fruit, 167
metabolism in *Amaranthus retroflexus*, 1
regulation of petiole epinasty, developmental mutants, tomato, 1341
stimulation of production, carbohydrates, tobacco leaf discs, 1246
Euglena, fumarase synthesis, translational regulation, light and ethanol, 63

F

Fatty acids
acylated proteins, halotolerant *Dunaliella salina*, 549
changes in enzymes for synthesis and desaturation, acclimation, soybean seeds, 760
deficiency in chloroplast 16:1/18:1 desaturase, *Arabidopsis thaliana* mutant, 522
different chain lengths, metabolic fate, developing oilseeds, 835
galactolipids, thylakoid pigment protein complex, *Dunaliella salina*, 610
hydroperoxides, metabolism, *Chlorella pyrenoidosa*, 125
Fenpropimorph, cyclopropyl sterol and phospholipid composition, membrane fractions, maize roots, 591

Ferns
Marsilea drummondii, hormone levels, apical dominance, 907
Onoclea sensibilis gametophytes, regulation of protein synthesis, photomorphogenesis, 1262
Ferredoxin
-dependent choline monooxygenase, spinach chloroplast stroma, 322
-$NADP^+$ oxidoreductase-binding protein complex, higher plants, 372
Ferritin, synthesis, iron induction, soybean cell suspensions, 586
Fescue, growth rates and assimilate partitioning, high and low irradiance, 1201
Flaveria, transfer of C_4 photosynthetic characters, hybridization, 1538
Flaveria chloraefolia, flavonol-specific sulfotransferases, 977
Flaveria trinervia, pH effect on kinetic parameters, NADP-malic enzyme, 401
Flavin, plasmalemma redox system, broadbean guard cells, 59
Flower, carnation petals, senescence-related genes, 690
Fluorescence
imaging, topography of photosynthesis, *Xanthium strumarium*, 1233
noncyclic photosynthetic electron transport, partitioning, tobacco, 1322
Freezing
injury, thermal transition and, pea and soybean seeds, 1121
reversible and irreversible injury, plasma membrane ATPase activity, potato, 1088
Fremyella diplosiphon, protein synthesis, phycobiliprotein mRNA abundance, light quality, 1486
Fructokinase, sucrolysis, potato and bean, 635
Fructose, uptake of sucrose, sugarcane internodes, 6
Fructose 2,6-bisphosphate
changes in response to temperature, green pepper, 458
hydrolyzing enzymes, spinach and Jerusalem artichoke, 827
Fumarase, synthesis, translational regulation, *Euglena*, 63
Fungus, host-pathogen interactions, tobacco, 208
Fusicoccin, binding to plasma membrane receptor, plasma membrane H^+-ATPase, radish, 133

G

Gabaculine, inhibitory effect, 5-aminolevulinate dehydratase activity, radish seedlings, 1293
Galactolipids, thylakoid pigment protein complexes, radioactive fatty acids, *Dunaliella salina*, 610
Galactose, inhibition of acid-enhanced elongation, corn root segments, 440
β-Galactosidase, radish seeds, 567
Gametophytes, *Onoclea sensibilis*, regulation of protein synthesis, photomorphogenesis, 1262
Gas exchange, steady state, ethylene exposure, *Xanthium strumarium*, 85
Germination
bean, cell wall synthesis, per-C-deuterated *myo*-inositol, 686
biosynthesis of cyanogenic glucoside dhurrin, sorghum seedling, 1552
biosynthesis of lipid transfer proteins, castor bean seeds, 841
developing seeds of castor bean, 702
lettuce seed, control processes, thermoinhibition, 311
phospholipid transfer protein, maize seeds, 1560
soybean, distinct lipoxygenase species, hypocotyl/radicle, 285
wheat embryos, heat shock response, 598
Gibberellic acid
carbamoyl phosphate synthetase, ornithine transcarbamylase, pea ovary, 1565
stimulation, hypocotyl elongation, cucumber, 1335
Gibberellin
A_1/A_3/iso-A_3, identification, *Azospirillum lipoferum*, 45
isolation of aleurone layers, fast and easy technique, barley, 388
purification, immunoaffinity techniques, plant extracts, 445
purification and quantification, immunological approach, 1148
responsiveness, temperature effect, wheat, 854
β-D-Glucan, antibodies, inhibition of cell elongation, corn coleoptile segments, 1353
Glucose, uptake of sucrose, sugarcane internodes, 6
Glucose-6-phosphate, activation of phosphoenolpyruvate carboxylases, 648
β-D-Glucosidase, soluble and bound apoplastic activity, primary leaves, barley and oat, 185
Glutamate, arginine metabolism, developing soybean cotyledons, 624
Glutamine synthetase, tissue and cellular distribution, roots of pea seedlings, 1129
Glycerol-3-phosphate acyltransferase, altered chloroplast structure, mutant *Arabidopsis*, 846
Glycine max (*see* Soybean)
Glycolate, metabolism, enzyme subcellular distribution, *Cyanidium caldarium*, 799
Glycolysis
carbohydrate reserve for CAM, soluble sugars, pineapple leaves, 91
phosphate starvation, *Brassica nigra*, 1275
Glycoproteins, xylose-specific antiserum, carrot, tobacco and bean, 1182
Glycosylation, zeatin enzymes, bean, *Phaseolus lunatus*, 1316
Grapefruit, sucrose-metabolizing enzymes, transport tissues, adjacent sink structures, 1394
Grasses, C_4, leaf carbon isotope discrimination, salt and water stress, 162
Gravitropism, influence of hook position, etiolated hypocotyls, *Arabidopsis thaliana*, 376
Guard cells
broad bean, abaxial epidermis, tetrazolium reduction, 59
protoplasts
Calvin-Benson cycle enzymes, broad bean, 1057
mechanically prepared epidermis, broad bean leaves, 1382

H

D-Hamamelonic acid 2^1-phosphate, 2-carboxyarabinitol-1-phosphate and, identical compounds, 13
H^+-ATPase
fusicoccin binding to plasma membrane receptor, radish seedlings, 133
lysophosphatidylcholine-stimulated accumulation, oat root plasma membrane vesicles, 1009
tonoplast vesicles, divalent cations, corn, 1636
Haustorium, *Polytrichum formosum*, transfer cells, transmembrane proton gradients, 913
Heat, evolution rates, sodium chloride effects, barley roots, 53
Heat shock
characterization of response, sugarcane cells, 1156
induction by methomyl, corn seedlings, 1256
protein synthesis and thermal tolerance, wheat, 140
response of germinating wheat embryos, 598
Hedera helix
zeaxanthin
high-energy-state quenching, 881
nonphotochemical quenching, 887
Helianthus annuus, boron deficiency, proton extrusion in carrot, 280
Helianthus tuberosus (*see* Artichoke, Jerusalem)
Herbicides
acifluorfen-methyl, protoporphyrinogen oxidase inhibition, cucumber, 1239
isoxaben, resistance, locus mutation in *Arabidopsis thaliana*, 146
photobleaching, protoporphyrin IX content, various plants, 1175
Heterozygotes, unique phenotype, auxin-insensitive tomato mutant, 1243
Hevea brasiliensis (*see* Rubber tree)
Hickory, thermal damage, chloroplast envelope membranes, 606
Histone, differential acetylation, growth in sodium chloride, alfalfa, 237
Hordeum vulgare (*see* Barley)
Hormones
levels, apical dominance, *Marsilea drummondii*, 907
pod development in oilseed rape, 876
Hybridization, transfer of C_4 photosynthetic characters, *Flaveria* species, 1538
Hydrogen, photoevolution of H_2, enzyme localization, *Chlamydomonas reinhardtii*, 788
Hydrogen peroxide, rapid stimulation of oxidative burst, elicitation, soybean, 109
Hydroperoxides, fatty acid metabolism, *Chlorella pyrenoidosa*, 125
Hydroxamic acid, glucosyltransferases, maize seedlings, 1071
Hydroxyl radical, lethal production, paraquat-treated plants, 1267
Hypocotyls
Arabidopsis thaliana, hook position, gravitropic curvature, 376
elongation in cucumber, gibberellic acid stimulation, 1335
germinating soybean, distinct lipoxygenase species, 285
soybean, diacylglycerol levels, auxin-stimulated growth, 275

I

Indoleacetic acid, quantitation of conjugates, direct tissue hydrolysis, bean seeds, 398
Indole-3-acetic acid
  hormone levels and apical dominance, *Marsilea drummondii*, 907
  simple purification, GC-SIM-MS analysis, 197
myo-Inositol, cell wall synthesis, germinating beans, 686
Inositol phospholipids, separation and characterization, pulvini of *Samanea saman*, 1422
Invertase, growth retardation, ^{13}C distribution, zinnia, 316
Ions
  phytochrome-controlled nyctinastic movements, calcium role, *Albizzia lophantha* leaflets, 1108
  transport processes, putrescine-induced wounding, corn seedlings, 988
Ipomoea batatas (*see* Sweet potato)
Ipomoea nil, stamen, 1-aminocyclopropane-1-carboxylic acid transport, 157
Iron
  deficiency, rhizosphere acidification, bean, 359
  induction of ferritin synthesis, soybean cell suspensions, 586
  -stress induced redox activity, plasma membrane, tomato, 151
Irradiance, high and low, assimilate partitioning, fescue, 1201
Isoprene, emission from aspen leaves, 267
Isoxaben, resistance, locus mutation, *Arabidopsis thaliana*, 146

K

Kalanchoë daigremontiana
  crassulacean acid metabolism, photosystem II, adaxial and abaxial parts, 948
  ferredoxin-NADP$^+$ oxidoreductase-binding protein complex, immunodetection, 372
3-Ketoacyl-acyl carrier protein synthase, cerulenin insensitivity, spinach leaves, 41

L

Lablab, chilling in light, 1609
Lactate, anaerobic production, cellular pH, various plants, 29
Lactate dehydrogenase, induction of alcohol dehydrogenase, hypoxically induced barley, 860
Larch, maturation, 406
Latuca sativa (*see* Lettuce)
Leaf
  Arabidopsis thaliana, desaturation of palmitic acid, lipids, 943
  aspen, isoprene emission, 267
  barley, cell development, rubisco activase and rubisco, 516
  bean
    cadmium influence, water relations, 1365
    photosystem II inhibition, thylakoid membrane lipid peroxidation, 1492
  broad bean, mechanically prepared epidermis, guard cell protoplasts, 1382
  C_3-C_4, environmental effects, photorespiration, 1022
  corn
    cDNA clones, NADH:nitrate reductase, 792
    $\delta^{13}C$ values, phospho*enol*pyruvate carboxylase, 582
    phosphoenolpyruvate carboxylase, 427
  Elodea canadensis, sulfide-resistant respiration, 1249
  fescue, growth rates, high and low irradiance, 1201
  Kalanchoë daigremontiana, crassulacean acid metabolism, photosystem II, 948
  maple, manganese accumulation, sun and shade leaves, 1417
  napiergrass, DNA methylation, embryogenic competence, 37
  olive, salt stress, gas-exchange properties, 1408
  pea, quantum efficiencies, photosystems I and II, 1029
  pineapple, carbohydrate reserves, crassulacean acid metabolism, 91
  Potamogeton lucens, carbon fixation, cell protoplasts, 1035
  Rhizophora mangle, zeaxanthin, induction and relaxation kinetics, 887
  soybean
    photosynthesis changes, other chloroplast traits, 773
    protein related to seed lectin, pod removal, 1387
  spinach
    cytosolic phosphofructokinase, 1498, 1506
    inactive photosystem II, 765
    3-ketoacyl-acyl carrier protein synthase, 41
    sources of carbon export, 1168
  sugar beet, phosphate status, carbon partitioning, 814, 820
  sunflower, zeaxanthin, high-energy-state quenching, 881
  tobacco discs, ethylene production, carbohydrates, 1246
  tomato, electrolyte leakage, *Cladosporium fulvum*, 867
  Xanthium strumarium
    ethylene exposure, steady state gas exchange, 85
    topography of photosynthesis, fluorescence imaging, 1233
Leaflet, *Albizzia lophtha*, calcium role, phytochrome-controlled nyctinastic movements, 1108
Lectin
  -like protein, developing cotyledons, bean, 1015
  seed, soybean leaf protein, pod removal, 1387
Leghemoglobin, lupin plants, 452
Lemna gibba
  potassium uptake, phase shifts of circadian rhythm, amino acid analogs, 1600
  uptake of acidic and basic sugar derivatives, 1532
Lemna minor (*see* Duckweed)
Lemna paucicostata
  aspartokinase, 1577, 1584
  synthesis of methylated ethanolamine moieties, 296
Lepidium sativum (*see* Cress)
Lettuce, seed germination, control processes, thermoinhibition, 311
Light
  activation of pyruvate and orthophosphate dikinase, role of metabolites, corn mesophyll cells, 330
  blue
    b-type cytochromes, higher plant plasma membranes, 1077
    tetrazolium reduction, broad bean guard cells, 59
  high intensity, thermal injury, wheat and thylakoids, 1041
  phosphorylation after chilling, cucumber, 657
  red, ubiquitin-phytochrome conjugates, monocots and dicots, 380
  regulation of phycobiliprotein mRNA, protein synthesis, *Fremyella diplosiphon*, 1486
  response of carbon dioxide assimilation, zeaxanthin content, sun and shade leaves, 881
  translational regulation, fumarase synthesis, *Euglena*, 63
Light-harvesting chlorophyll-protein, light intensity and, greening seedlings, barley and pea, 560
Light harvesting complex II
  denaturation transition, spinach chloroplast membranes, 492
  photosystem II, circadian rhythm, bean, 665
Lime, Palestine and Persian, vacuolar acid hydrolysis, sucrose breakdown, 530
Linden, thermal damage, chloroplast envelope membranes, 606
Lipids
  chilling-induced degradation, cucumber, 1049
  composition, oat root and coleoptile plasma membranes, 1207
  composition of plasma membranes and endomembranes, barley roots, 955
  desaturation deficiency, thermal tolerance, *Arabidopsis thaliana*, 1134
  desaturation of palmitic acid, *Arabidopsis thaliana*, 943
  nonspecific transfer proteins, biosynthesis, germinating castor bean seeds, 841
  peroxidation, photosystem II inhibition, bisulfite-treated bean leaves, 1492
  peroxidation and lipoxygenase, *Cladosporium fulvum*, tomato leaf tissue, 867
  selective delipidation of plasma membrane, surfactants, oat, 1524
Lipoxygenase, distinct species, hypocotyl/radicle, germinating soybean, 285
Liriodendron tulipifera (*see* Tulip poplar)
Lolium perenne (*see* Ryegrass, perennial)
Lupin
  distribution of ^{15}N, 420
  leghemoglobin, 452
Lycopersicon esculentum (*see* Tomato)
Lysophosphatidylcholine, stimulation of ATP-dependent proton accumulation, oat root plasma membrane vesicles, 1009

M

Magnesium, cytosolic phosphofructokinase, spinach leaves, 1506
Maize (*see* Corn)
Malate, oxygen and, inhibited nitrogenase, soybean nodules, 224
Malate dehydrogenase, soluble and bound apoplastic activity, primary leaves, barley and oat, 185
Malic enzymes
  higher plants, 367
  NADP-, pH effect on kinetic parameters,

Flaveria trinervia, 401
Manganese, accumulation in maple sun leaves and shade leaves, 1417
Mangrove
zeaxanthin synthesis
energy dissipation, chilling temperatures, 894
nonphotochemical quenching, 887
Maple
Norway, thermal damage, chloroplast envelope membranes, 606
sun and shade leaves, manganese accumulation, 1417
Marsilea drummondii, hormone levels and apical dominance, 907
Medicago sativa (*see* Alfalfa)
Membrane potential, boron deficiency in *Elodea densa*, *Helianthus annuus* root, proton extrusion in carrot, 280
Mesophyll cells
barley seedling leaf blades, low chloride concentrations, salt stress, 1440
corn, role of metabolites, light/dark-regulation of dikinase, 330
Methomyl, heat shock protein synthesis, corn seedlings, 1256
Methylation
synthesis of ethanolamine moieties
Lemna paucicostata, 296
soybean and carrot, 306
Microsomes, radish seedlings, fusicoccin binding, plasma membrane receptor, 133
Millet, chilling in light, 1609
Mitochondria, turnip, control, phosphorylation-coupled respiration, 928
Molybdenum, cofactor, abscisic acid accumulation during water stress, barley mutant, 728
Monoclonal antibodies, immunological approach, gibberellin purification and quantification, 1148
Monocots, red light-induced accumulation, ubiquitin-phytochrome conjugates, 380
Monstera deliciosa, zeaxanthin and high-energy-state quenching, 881
Mosses, transmembrane proton gradients, transfer cells, 913
Mung bean, seedling, characterization, tonoplast ATPase, 475
Musa paradisiaca sapientum (*see* Bananas)
Mutations, locus of *Arabidopsis thaliana*, resistance, isoxaben, 146
Myrosinase, effect of castanospermine, cress seedlings, 48

N

NADH, tetrazolium reduction by guard cells, abaxial epidermis, broadbean, 59
NADH-glutamate synthase, purification and characterization, alfalfa root nodules, 351
NAD(P)$^+$:glyceraldehyde-3-phosphate dehydrogenase, NADH:nitrate reductase and, cDNA clones, corn leaf, 792
NADP-malic enzyme, pH effect on kinetic parameters, *Flaveria trinervia*, 401
Napiergrass, leaves and callus, DNA methylation, embryogenic competence, 37
Needle, Norwegian spruce, superoxide dismutase activity, 1310
Nicotiana (*see* Tobacco)
Nifedipine, effect on calcium channels, pulvinar movements, *Cassia fasciculata*, 697
Nitellopsis obtusa, salt stress-induced cytoplasmic acidification, vacuolar alkalinization, 1102
Nitrate
effects on nitrate reductase activity and mRNA levels, maize suspension cultures, 962
influx, studies of regulation, barley seedlings, 806
leghemoglobin in lupin plants, 452
transient accumulation of nitrite reductase mRNA, maize, 1214
Nitrate reductase, chloride inhibition, spinach, 70
Nitrite reductase, transient mRNA accumulation, maize, 1214
Nitrogen
arginine metabolism, developing soybean cotyledons, 624
distribution of ^{15}N, pea, lupin and soybean nodules, 420
liquid, cooling rate, various seeds, 1478
nutrition of nodules, relation to "N-hunger," cowpea, 1644
Nitrogenase, inhibition, oxygen and malate effect, soybean nodules, 224
Nodulation, lack of systemic suppression, split root systems, supernodulating soybean mutants, 1347
Nodule, cowpea, nitrogen nutrition, "N-hunger," 1644
2,5-Norbornadiene, effect upon ethylene biosynthesis, midclimacteric carnation flowers, 21
Nuclear magnetic resonance
carbon-13, suberized potato cell wall, 783
cell wall-associated calcium-phosphates, *Ulva lactuca*, 230
rhizosphere acidification, iron deficient bean plants, 359
salt stress-induced cytoplasmic acidification, vacuolar alkalinization, *Nitellopsis obtusa*, 1102
thermal damage to chloroplast envelope membranes, 606
Nyctinastic movement, phytochrome-controlled, calcium role, *Albizzia lophantha* leaflets, 1108

O

Oat
apoplastic enzyme activity, 185
chilling in light, 1609
coleoptile, pH-dependence, extension growth, 202
improved method for polyamine analysis, 434
root and coleoptile, comparison, lipid composition, 1207
root plasma membrane vesicles, lysophosphatidylcholine, ATP-dependent proton accumulation, 1009
selective delipidation of plasma membrane, surfactants, 1524
Oilseeds, metabolic fate of fatty acids, different chain lengths, 835
Olea europea (*see* Olive)
Olive, salt-stressed leaves, gas-exchange properties, 1408
Onoclea sensibilis, photomorphogenesis of gametophytes, regulation, protein synthesis, 1262
Orange, pectic enzymes in pectolyase, 191
Ornithine transcarbamylase, activity in pea ovary, 1565
Orthophosphate dikinase, role of metabolites in light activation, corn mesophyll cells, 330
Oryza sativa (*see* Rice)
Osmotin, molecular cloning, abscisic acid, tobacco, 1096
Ovary, pea, carbamoyl phosphate synthetase, ornithine transcarbamylase, 1565
Ovules, isolation of eggs and embryo sacs, *Plumbago zeylanica*, 9
Oxygen
low
cell wall enzymes, banana, 251
cell wall hydrolytic enzymes, avocado, 259
inhibited photosynthesis and starch, potato, 385
malate and, inhibited nitrogenase, soybean nodules, 224
^{18}O-labeling, photorespiratory rates, wheat and maize, 500
quencher, pH effect, hypersensitive reaction in tobacco, 25
-resistant photosynthesis, tobacco plants, 1457
zeaxanthin, relaxation kinetics, nonphotochemical quenching, 887
Ozone, concentration in intercellular spaces, sunflower and *Perilla ocymoides*, 1163

P

Palmitic acid, desaturation, leaf lipids, *Arabidopsis thaliana*, 943
Paraquat, -treated plants, lethal hydroxyl radical production, 1267
Parenchyma cells, uptake of sucrose, sugarcane internodes, 6
Pathogen, -host interactions, soybean, 542
Pea
autophosphorylation of protein kinase, 1279
bacterial and plant cytochrome *P*-450 monooxygenases, antigenic crossreactivity, 534
calcium gating of proton fluxes, intact chloroplasts, 1513
chilling in light, 1609
chloroplast processing enzyme, cleavage, chlorophyll *a*/*b* binding protein precursor, 117
chloroplasts, endopeptidases, stroma and thylakoids, 1616
distribution of ^{15}N, 420
effects of cooling rate on seeds, exposure, liquid nitrogen temperatures, 1478
improved method for polyamine analysis, 434
leaf, quantum efficiencies, photosystems I and II, 1029
light intensity, light-harvesting chlorophyll-protein, 560
nodules, isoenzymes, superoxide dismutase, 1286
ovary, carbamoyl phosphate synthetase, ornithine transcarbamylase, 1565
photosystem II electron transport, copper toxicity, 175
red light-induced accumulation, ubiquitin-phytochrome conjugates, 380
seed, relationship, thermal transition and freezing injury, 1121
seedling, tissue and cellular distribution, glutamine synthetase, 1129

Peanut, thermal regulation, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, 1298
Pectolyase, pectic enzymes, 191
Pennisetum purpureum (*see* Napiergrass)
Pepper, changes in fructose 2,6-bisphosphate levels, temperature response, 458
Peribacteroid membrane, soybean root nodules, electrogenic ATPase activity, 982
Pericarp discs, ripening in tomato fruit, effect, alcohols and ethylene, 167
Perilla ocymoides, ozone concentration, intercellular spaces, 1163
Peroxidase, soluble and bound apoplastic activity, primary leaves, barley and oat, 185
Peroxisome, compartmentation of enzymes, prasinophyceae, microbes without catalase, 754
Persea americana (*see* Avocado)
Petiole, developmental mutants of tomato, auxin and ethylene regulation, epinasty, 1341
pH
  cell sap, anaerobic succinate-lactate production, various plants, 29
  dependence of extension growth, oat coleoptiles, auxin action, 202
  extracellular, UV-induced potassium efflux, rose cells, 749
  kinetic parameters of NADP-malic enzyme, *Flaveria trinervia*, 401
  singlet oxygen quenchers and, hypersensitive reaction, tobacco, 25
Phaseolus lunatus, zeatin glycosylation enzymes, 1316
Phaseolus vulgaris (*see* Bean)
Phenylalanine ammonia-lyase, cDNA clone, cut-injured roots, sweet potato, 1403
Phosphatase, chloroplast, 2-carboxyarabinitol 1-phosphate degradation, tobacco, 673
Phosphate
  starvation inducible glycolytic bypasses, *Brassica nigra*, 1275
  status in sugar beet leaf, carbon partitioning, photosynthesis, 814, 820
Phosphates, calcium and, cell wall association, *Ulva lactuca*, 230
Phosphatidate phosphatase, microsomal, maturing safflower seeds, 413
Phosphatidylinositol 4,5-bisphosphate, phospholipase C and phosphomonoesterase, *Dunaliella salina* membranes, 1115
Phosphoenolpyruvate, starvation inducible glycolytic bypasses, *Brassica nigra*, 1275
Phospho*enol*pyruvate carboxylase
  acclimation of two tomato species, high atmospheric carbon dioxide, 1473
  activation by glucose-6-phosphate, higher plants, 648
  $\delta^{13}C$ values in maize leaf, 582
  maize leaf, 427
  thermal regulation, C_3 and C_4 plants, 1298
Phospho*enol*pyruvate phosphatase, purification, *Brassica nigra* suspension cells, 734
Phosphofructokinase, cytosolic, spinach leaves, 1498, 1506
Phospholipids
  composition of membrane fractions, fenpropimorph treatment, maize roots, 591
  transfer protein, maturation and germination, maize seeds, 1560
Phosphorylation
  after chilling in light, cucumber, 657
  -coupled respiration, control, turnip mitochondria, 928
Photoinhibition, comparison of photomorphogenic responses, ultraviolet light, red and white cabbage, 345
Photomorphogenesis, regulation of protein synthesis, *Onoclea sensibilis* gametophytes, 1262
Photorespiration
  environmental effects, C_3-C_4 species, 1022
  rates, ^{18}O-labeling, wheat and maize, 500
Photosynthesis
  absolute rates, screening method, single algal colonies, 246
  adaptation, dissolved inorganic carbon, *Synechococcus leopoliensis*, 720
  C_4, transfer through hybridization, *Flaveria* species, 1538
  changes, lanceolate leaflet isoline, soybean, 773
  enhanced thermal tolerance, lipid desaturation deficiency, *Arabidopsis thaliana*, 1134
  enhancement of thermal injury, high light intensity, wheat and thylakoids, 1041
  isoprene emission, aspen leaves, 267
  leaf phosphate status, carbon partitioning, sugar beet, 814
  low oxygen inhibition, inhibited starch synthesis, potato, 385
  noncyclic electron transport, partitioning, tobacco, 1322
  O_2-resistant, tobacco plants, 1457
  topography of activity, fluorescence imaging, *Xanthium strumarium*, 1233
Photosystem II
  electron transport in pea, copper toxicity, 175
  inactive, spinach leaves, 765
  inhibition, lipid peroxidation, bisulfite-treated bean leaves, 1492
  light-harvesting complex, circadian rhythm, bean, 665
  photochemical efficiency, crassulacean acid metabolism, *Kalanchoë daigremontiana*, 948
  photosystem I and, quantum efficiencies, pea leaves, 1029
  reaction center
    denaturation transition, spinach chloroplast membranes, 575
    spectral properties, *Synechocystis* 6803
Phototropism, influence of hook position, etiolated hypocotyls, *Arabidopsis thaliana*, 376
o-Phthalaldehyde, improved method for polyamine analysis, plant tissue, 434
Phycobiliprotein, mRNA regulation by protein synthesis, *Fremyella diplosiphon*, 1486
Phycocyanin, photosystem II reaction center, spectral properties, *Synechocystis* 6803, 617
Phytoalexin
  host-pathogen interactions in soybean, 542
  rapid stimulation of oxidative burst, elicitation, soybean, 109
Phytochrome
  -controlled nyctinastic movements, calcium role, *Albizzia lophantha* leaflets, 1108
  control processes of thermoinhibition, lettuce seed germination, 311
  -mediated pulvinar movements, compounds affecting calcium channels, *Cassia fasciculata*, 697
  regulation of 5-aminolevulinic acid synthesis, developing chloroplasts, cucumber, 1003
  -ubiquitin conjugate accumulation, red light, monocots and dicots, 380
Phytohemagglutinin, -deficient bean, synthesis, lectin-like protein, 1015
Phytophthora parasitica, elicitors, proteinase inhibitor induction, tobacco, 1065
Phytotoxins, syringomycin, stomata closing, *Xanthium strumarium* and broad bean, 1435
Picea abies (*see* Spruce, Norwegian)
Picea rubens (*see* Spruce, red)
Pigweed
  redroot, photoporphyrin IX content, photobleaching herbicides, 1175
  role of ethylene metabolism, 1
Pine, loblolly and scotch, assay, electrophoresis of superoxide dismutase, 742
Pineapple, leaf, carbohydrate reserves, crassulacean acid metabolism, 91
Pisum sativum (*see* Pea)
Plasmalemma
  sunflower and *Perilla ocymoides*, ozone concentration, intercellular spaces, 1163
  tetrazolium reduction, abaxial epidermis, broad bean guard cells, 59
Plasma membrane
  ATPase activity
    freezing injury, potato, 1088
    target molecular size, beet, 394
  Ca^{2+}-ATPase, active calcium transport, radish seedlings, 1429
  Dunaliella salina, phosphatidylinositol 4, 5-bisphosphate phospholipase C, phosphomonoesterase, 1115
  fusicoccin receptor binding, H^+-ATPase, radish seedlings, 133
  higher plants, *b*-type cytochromes, 1077
  iron-stress induced redox activity, tomato, 151
  lipid composition, barley roots, 955
  oat root and coleoptile, comparison, lipid composition, 1207
  rhizosphere acidification, iron deficient bean plants, 359
  selective delipidation, surfactants, oat, 1524
Plastid, DNA, hypohaploid tobacco plants, 390
Plumbago zeylanica, egg and embryo sac isolation, 9
Pod, development, hormones, oilseed rape, 876
Polyamines
  improved method for analysis, plant tissue, 434
  synthesis, maize cell lines, 1378
Polygalacturonase
  immunocytolocalization, ripening tomato fruit, 17
  transcriptional analysis, tomato, 1372
Polygalacturonase-inhibiting protein, host-pathogen interactions in soybean, 542
Polyhydroxyalkaloids, effect of castanospermine, purified myrosinase, cress seedlings, 48
Polypeptides, changes induced by salt, barley

root, 1444
Polytrichum formosum, transfer cells, transmembrane proton gradients, 913
Populus balsamifera, zeaxanthin, relaxation kinetics, nonphotochemical quenching, 887
Populus tremuloides (*see* Aspen)
Potamogeton lucens, carbon fixation by leaves, leaf cell protoplasts, 1035
Potassium
two modes of rubidium uptake, sunflower plants, 939
uptake by *Lemna gibba*, phase shifts of circadian rhythm, amino acid analogs, 1600
UV-induced efflux, extracellular pH, rose cells, 749
Potato
low oxygen inhibition of photosynthesis, inhibition of starch synthesis, 385
maize kernels and, comparison, starch branching enzymes, 75
plasma membrane ATPase activity, freezing injury, 1088
suberized cell wall, ^{13}C nuclear magnetic resonance study, 783
sucrolysis characterization, uridine diphosphate, pyrophosphate, 635
Protein
fatty acid acylated, halotolerant *Dunaliella salina*, 549
regulation of synthesis, *Onoclea sensibilis* gametophytes, 1262
soybean leaf, relation to seed lectin, pod removal, 1387
storage, loss from soybean pods, seed development, 1252
Proteinase, induction of inhibitors, elicitors of *Phytophthora parasitica*, tobacco, 1065
Protein kinase, autophosphorylation, pea, 1279
Protons
ATP-dependent accumulation, lysophosphatidylcholine, oat root plasma membrane vesicles, 1009
extrusion in carrot, boron deficiency, *Elodea densa* and *Helianthus annuus*, 280
fluxes, calcium gating, intact pea chloroplasts, 1513
pump, target molecular size, maize root tonoplast, 934
transmembrane, transfer cells, *Polytrichum formosum*, 913
Protoplasts
corn root, cytoplasmic calcium activity, salinity stress, 1271
guard cell
Calvin-Benson cycle enzymes, broad bean, 1057
mechanically prepared epidermis, broad bean leaves, 1382
higher plant cell, cytoplasmic calcium levels, Quin-2 and Aequorin, 482
Protoporphyrin IX, activity of photobleaching herbicides, cucumber, redroot pigweed and velvetleaf, 1175
Protoporphyrinogen oxidase, inhibition by herbicide acifluorfen-methyl, cucumber, 1239
Pulvini, *Samanea saman*, separation, inositol phospholipids, 1422
Putrescine, -induced wounding, ion transport processes, corn seedlings, 988
Pyrophosphate, sucrolysis, potato and bean, 635
Pyrophosphate:6-phosphofructokinase, carbohydrate reserve for CAM, soluble sugars, pineapple leaves, 91
Pyruvate, role of metabolites in light activation, corn mesophyll cells, 330

Q

Quin-2, cytoplasmic calcium levels, higher plant cell protoplasts, 482

R

Radish
fusicoccin binding to plasma membrane receptor, plasma membrane H^+-ATPase, 133
β-galactosidase from seed, 567
seedling
Ca^{2+}-ATPase, active calcium transport, 1429
gabaculine inhibition, 5-aminolevulinate dehydratase activity, 1293
Rapeseed, hormones and pod development, 876
Raphanus sativus (*see* Radish)
Receptors, fusicoccin, plasma membrane H^+-ATPase, radish seedlings, 133
Respiration
aerobic and anaerobic, intact spinach chloroplast, 653
phosphorylation-coupled, control, turnip mitochondria, 928
sulfide-resistant, *Elodea canadensis* leaves, 1249
Rhizophora mangle (*see* Mangrove)
Rhizosphere, acidification, iron deficient bean plants, 359
Ribonucleic acid
differential accumulation of transcript, CaMV 35S promoter, transgenic tobacco, 1570
procedures for generation of mature zygotes, *Chlamydomonas reinhardtii*, 512
Ribonucleic acid, messenger
biosynthesis of lipid transfer proteins, germinating castor bean seeds, 841
circadian rhythm, light-harvesting complex-II, bean, 665
nitrate reductase activity, maize, 962
phycobiliprotein, regulation by protein synthesis, *Fremyella diplosiphon*, 1486
senescence-related genes, carnation flower petals, 690
transcriptional analysis, polygalacturonase, tomato, 1372
translatable, polypeptide changes and salt, barley root, 1444
Ribulose-1,5-bisphosphate carboxylase, thermal regulation, C_3 and C_4 plants, 1298
Ribulose-1,5-bisphosphate carboxylase/oxygenase
acclimation of two tomato species, high atmospheric carbon dioxide, 1473
rubisco activase prevention of activity decline, 968
Rice
anaerobic succinate-lactate production, cellular pH, 29
chilling in light, 1609
transformation, evaluation, selectable markers, 217
Ricinus communis (*see* Castor bean)
Ripening
epidermal pericarp discs, alcohols and ethylene, tomato fruit, 167
transcriptional analysis, polygalacturonase, tomato, 1372
Root
alfalfa
nodules, aspartate aminotransferase, 1622
purification, NADH-glutamate synthase, 351
barley
anaerobic induction, alanine aminotransferase, 1305
lipid composition, plasma membranes and endomembranes, 955
polypeptide changes, salt, 1444
sodium chloride effect, metabolic heat evolution rates, 53
barley seedlings, studies of regulation, nitrate influx, 806
corn
cyclopropyl sterol and phospholipid composition, fenpropimorph, 591
inhibition of acid-enhanced elongation, galactose, 440
proton pumps, target molecular size, 934
corn protoplasts, cytoplasmic calcium activity, salinity stress, 1271
Elodea densa, boron deficiency, 280
Helianthus annuus, boron deficiency, 280
oat
lipid composition, plasma membrane, 1207
lysophosphatidylcholine, proton accumulation, 1009
pea, tumorigenesis assay, crown gall susceptibility, 180
pea seedling, tissue and cellular distribution, glutamine synthetase, 1129
soybean, nodulation, lack of systemic suppression, 1347
soybean nodules, peribacteroid membrane, electrogenic ATPase activity, 982
sweet potato, cDNA clone, phenylalanine ammonia-lyase, 1403
tomato, iron-stress induced redox activity, plasma membrane, 151
Rose, effects of extracellular pH, UV-induced potassium efflux, 749
Rubber tree, cyanogenesis, inhibition, active defense reactions, 33
Rubidium, uptake, sunflower plants, 939
Rubisco activase, rubisco and, coordinate expression, barley leaf cell development, 516
Rubisco inhibitor, 2-carboxyarabinitol-1-phosphate, D-hamamelonic acid 2'-phosphate, identical compounds, 13
Rye
anaerobic succinate-lactate production, cellular pH, 29
red light-induced accumulation, ubiquitin-phytochrome conjugates, 380
Ryegrass, perennial, paraquat-treated, lethal hydroxyl radical production, 1267

S

Saccharum officinarum (*see* Sugarcane)
Safflower
maturing seeds, microsomal phosphatidate phosphatase, 413
metabolic fate of fatty acids, different chain

lengths, 835
Saline, fatty acid acylated proteins, halotolerant *Dunaliella salina*, 549
Salinity
effects of sodium chloride, metabolic heat evolution rates, barley roots, 53
stress, cytoplasmic calcium activity, corn root protoplasts, 1271
Salt
effect on polypeptides and translatable mRNAs, barley roots, 1444
stress
gas-exchange properties, olive leaves, 1408
leaf carbon isotope discrimination, C_4 grasses, 162
low chloride concentrations, barley seedling leaf blades, 1440
stress-induced cytoplasmic acidification, vacuolar alkalinization, *Nitellopsis obtusa*, 1102
Samanea saman, pulvini, separation, inositol phospholipids, 1422
Secale cereale (*see* Rye)
Seed
Arabidopsis thaliana, development, abscisic acid biosynthesis, 463
bean, quantitation, indoleacetic acid conjugates, 398
castor bean, germination, lipid transfer proteins, 841
corn, phospholipid transfer protein, maturation and germination, 1560
dormancy, abscisic acid responses, wheat, 643
germinating wheat embryos, heat shock response, 598
lectin, soybean leaf protein, pod removal, 1387
lettuce, germination, thermoinhibition, 311
oilseed rape, hormones, pod development, 876
pea, relationship, thermal transition and freezing injury, 1121
radish, β-galactosidase, 567
safflower, maturation, microsomal phosphatidate phosphatase, 413
soybean
acclimation, enzyme changes for fatty acid synthesis, 760
development, storage protein loss from pods, 1252
relationship, thermal transition and freezing injury, 1121
Seedling
barley
light intensity, light-harvesting chlorophyll-protein, 560
mesophyll cell, low chloride and salt stress, 1440
studies of regulation, nitrate influx, 806
castor bean, development, germination, 702
corn
heat shock protein synthesis, methomyl, 1256
hydroxamic acid glucosyltransferases, 1071
post-transcriptional control, sucrose synthase, 1359
putrescine-induced wounding, ion transport, 988
cress, castanospermine effect, myrosinase, 48
mung bean, characterization, tonoplast ATPase, 475
pea
light intensity, light-harvesting chlorophyll-protein, 560
root tumorigenesis assay, crown gall susceptibility, 180
tissue and cellular distribution, glutamine synthetase, 1129
radish
Ca^{2+}-ATPase, active calcium transport, 1429
fusicoccin binding, plasma membrane receptor, 133
gabaculine inhibition, 5-aminolevulinate dehydratase activity, 1293
sorghum, biosynthesis, cyanogenic glucoside dhurrin, 1552
Senescence
activity in pea ovary, carbamoyl phosphate synthetase, ornithine transcarbamylase, 1565
-induced diisopropylfluorophosphate-binding protein, spinach, 338
-related genes, carnation flower petals, 690
Sesame, chilling in light, 1609
Setcreasea purpurea, symplastic transport of carboxyfluorescein, 1143
Shoot, larch, maturation, 406
Sodium chloride
effects on metabolic heat evolution rates, barley roots, 53
growth of alfalfa, differential histone acetylation, 237
Solanum tuberosum (*see* Potato)
Sorghum
chilling in light, 1609
seedling, biosynthesis, cyanogenic glucoside dhurrin, 1552
thermal regulation, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, 1298
Soybean
cell suspensions, iron induction, ferritin synthesis, 586
developing cotyledons, arginine metabolism, 624, 631
effects of cooling rate on seeds, exposure, liquid nitrogen temperatures, 1478
estimation of ammonium concentration, cytosol of nodules, 779
excised hypocotyl segments, diacylglycerol levels, auxin-stimulated growth, 275
germinating, lipoxygenase species, hypocotyl/radicle, 285
host-pathogen interactions, 542
improved method for polyamine analysis, 434
lanceolate leaflet isoline, photosynthesis changes, other chloroplast traits, 773
leaf protein related to seed lectin, pod removal, 1387
nodules
distribution of ^{15}N, 420
oxygen and malate effect, inhibited nitrogenase, 224
preferential loss of storage protein from pods, seed development, 1252
rapid stimulation of oxidative burst, 109
root nodules, peribacteroid membrane, electrogenic ATPase activity, 982
seed
acclimation, enzyme changes for fatty acid synthesis, 760
relationship, thermal transition and freezing injury, 1121
supernodulating mutants, lack of systemic suppression, nodulation in split root systems, 1347
synthesis of methylated ethanolamine moieties, 306
thermal regulation, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, 1298
zeaxanthin synthesis, energy dissipation, chilling temperatures, 894
Spinach
chloroplast, aerobic and anaerobic respiration, 653
chloroplast membranes
denaturation transition, photosystem II reaction center, 575
denaturation transition, light harvesting complex II, 492
chloroplast stroma, ferredoxin-dependent choline monooxygenase, 322
diisopropylfluorophosphate-binding protein, senescence-induced, 338
ferredoxin-$NADP^+$ oxidoreductase-binding protein complex, immunodetection, 372
fructose 2,6-bisphosphate hydrolyzing enzymes, 827
leaf
cytosolic phosphofructokinase, 1498, 1506
inactive photosystem II, 765
sources of carbon export, 1168
nitrate reductase, chloride inhibition, 70
short chain 3-ketoacyl-acyl carrier protein synthase, 41
Spinacia oleracea (*see* Spinach)
Spirodela polyrrhiza (*see* Duckweed)
Spruce
Norwegian, superoxide dismutase activity, needles, 1310
red, electrophoresis, superoxide dismutase, 742
Stamen, *Ipomoea nil*, 1-aminocyclopropane-1-carboxylic acid transport, 157
Staminal hair cells, symplastic transport of carboxyfluorescein, *Setcreasea purpurea*, 1143
Starch
acclimation of two tomato species, high atmospheric carbon dioxide, 1465, 1473
branching enzymes, comparison, potato tubers and maize kernels, 75
carbon partitioning, leaf phosphate status, sugar beet, 814, 820
inhibited synthesis, low oxygen, potato, 385
sources of carbon export, spinach leaves, 1168
taproots of contrasting genotypes, structure, alfalfa, 1189
Stem, zinnia, growth retardation, uniconazol, 316
Stomata
circadian rhythm, epidermal peels, broad bean, 1329
sunflower and *Perilla ocymoides*, ozone concentration, intercellular spaces, 1163
Xanthium strumarium and broad bean, closing, syringomycin, 1435
Stroma, endopeptidases, pea chloroplasts, 1616
Succinate, anaerobic production, cellular pH,

various plants, 29
Succinate dehydrogenase, chloroplastic, electron transport chains, *Chlamydomonas reinhardtii*, 1084
Sucrolysis, uridine diphosphate, pyrophosphate, potato and bean, 635
Sucrose
breakdown, vacuolar acid hydrolysis, lime, 530
-metabolizing enzymes in transport tissues, adjacent sink structures, developing citrus fruit, 1394
sources of carbon export, spinach leaves, 1168
uptake into sugarcane internodes, 6
Sucrose synthase, post-transcriptional control, anaerobic seedlings, corn, 1359
Sugar
acclimation of two tomato species, high atmospheric carbon dioxide, 1465, 1473
acidic and basic derivatives, uptake, *Lemna gibba*, 1532
effect of low oxygen, cell wall enzymes, banana, 251
solubie, carbohydrate reserve for CAM, pineapple leaves, 91
Sugarcane
characterization of heat shock response, 1156
ferredoxin-NADP$^+$ oxidoreductase-binding protein complex, immunodetection, 372
internodes, uptake of sucrose, 6
Sulfotransferases, flavonol-specific, partial purification, *Flaveria chloraefolia*, 977
Sunflower
effects of cooling rate on seeds, exposure, liquid nitrogen temperatures, 1478
ozone concentration, intercellular spaces, 1163
two modes of rubidium uptake, 939
zeaxanthin and high-energy-state quenching, 881
Superoxide dismutase
activity in needles of Norwegian spruce trees, 1310
assay and electrophoresis, red spruce, loblolly and scotch pine, 742
isoenzymes in nodules, bean, pea and *Vigna unguiculata*, 1286
Surfactants, selective delipidation, oat, 1524
Sweet potato, cDNA clone for phenylalanine ammonia-lyase, cut-injured roots, 1403
Synechococcus leopoliensis, photosynthesis adaptation, dissolved inorganic carbon, 720
Synechococcus UTEX 625, use of carbon oxysulfide, active carbon dioxide transport, 1221
Synechocystis 6803, spectral properties, reaction center, photosystem II, 617
Synechocystis PCC 6174, carbonic anhydrase activity, inorganic carbon internal pool, correlation, 470
Syringomycin, stomata closing, *Xanthium strumarium*, broad bean, 1435

T

Taproot, contrasting genotypes of alfalfa, structure, starch, 1189
Temperature
acclimation of soybean seeds, enzyme changes, fatty acid synthesis, 760
changes in fructose 2,6-bisphosphate levels, green pepper, 458
chilling, zeaxanthin synthesis, mangrove and soybean, 894
effect on gibberellin responsiveness, tall and dwarf wheat genotypes, 854
low, photoinhibition, various plants, 1609
thermal regulation in C_3 and C_4 plants, phosphoenolpyruvate carboxylase, ribulose-1,5-bisphosphate carboxylase, 1298
thermal tolerance, heat shock protein synthesis, wheat, 140
Tetrazolium, reduction by guard cells, abaxial epidermis, broadbean, 59
Thermoinhibition, induction and relief, control processes, lettuce seed germination, 311
Thylakoid pigment protein complex, galactolipids, radioactive fatty acids, *Dunaliella salina*, 610
Thylakoids
diisopropylfluorophosphate-binding protein, senescence-induced, spinach, 338
endopeptidases, pea chloroplasts, 1616
enhancement of thermal injury, photosynthesis, high light intensity, 1041
ferredoxin-NADP$^+$ oxidoreductase-binding protein complex, higher plants, 372
Tilia europaea (*see* Linden)
Tobacco
characterization of xylose-specific antiserum, glycoproteins, 1182
degradation of 2-carboxyarabinitol 1-phosphate, specific chloroplast phosphatase, 673
ferredoxin-NADP$^+$ oxidoreductase-binding protein complex, immunodetection, 372
host-pathogen interactions, 208
induction of proteinase inhibitors, elicitors, *Phytophthora parasitica*, 1065
molecular cloning of osmotin, abscisic acid, low water potential, 1096
novel O_2-resistant photosynthesis, 1457
partitioning, noncyclic photosynthetic electron transport, 1322
plastid DNA of hypohaploid plants, 390
purification and properties, 2-carboxy-D-arabinitol 1-phosphatase, 679
singlet oxygen quenchers and pH, bacterially-induced hypersensitive reaction, 25
stimulation of ethylene production, carbohydrates, 1246
transgenic, transcript accumulation, CaMV 35S promoter, 1570
Tomato
acclimation, high atmospheric carbon dioxide, 1465, 1473
auxin-insensitive mutant, unique phenotype, heterozygotes, 1243
chilling in light, 1609
developmental mutants, auxin and ethylene regulation, petiole epinasty, 1341
elicitors from *Cladosporium fulvum*, electrolyte leakage, lipoxygenase, 867
iron-stress induced redox activity, plasma membrane, 151
pectic enzymes in pectolyase, 191
ripening fruit, immunocytolocalization, polygalacturonase, 17
transcriptional analysis, polygalacturonase, 1372
Tonoplast vesicles
ATPase, characterization, etiolated mung bean seedlings, 475
corn root, target molecular size, proton pump, 934
H^+-ATPase, divalent cations, corn, 1636
Transposon Tn5, induction of cytochrome mutants, *Bradyrhizobium*, 553
Triacylglycerol, microsomal phosphatidate phosphatase, maturing safflower seeds, 413
Triticum aestivum (*see* Wheat)
Tulip poplar, thermal damage, chloroplast envelope membranes, 606
Tumorigenesis, root assay, crown gall susceptibility, pea, 180
Turnip, mitochondria, control, phosphorylation-coupled respiration, 928

U

Ubiquitin, -phytochrome conjugate accumulation, red light, monocots and dicots, 380
UDP-apiose, developmental control of apiogalacturonan biosynthesis, duckweed, 972
UDP-glucose:(1,3)-β-glucan synthase, carrot, 101
Ultraviolet light
comparison of photomorphogenic responses, red and white cabbage, 345
-induced potassium efflux, extracellular pH, rose cells, 749
Ulva lactuca, cell wall-associated calcium-phosphates, ^{31}P NMR studies, 230
Uniconazol, invertase and growth retardation, ^{13}C distribution, zinnia, 316
Uridine diphosphate, sucrolysis, potato and bean, 635

V

Vacuole, symplastic transport of carboxyfluorescein, *Setcreasea purpurea*, 1143
Velvetleaf, photoporphyrin IX content, activity, photobleaching herbicides, 1175
Verapamil, effect on calcium channels, pulvinar movements, *Cassia fasciculata*, 697
Vicia faba (*see* Broad bean)
Vigna radiata (*see* Mung bean)
Vigna unguiculata (*see* Cowpea)
Viruses, host-pathogen interactions, tobacco, 208

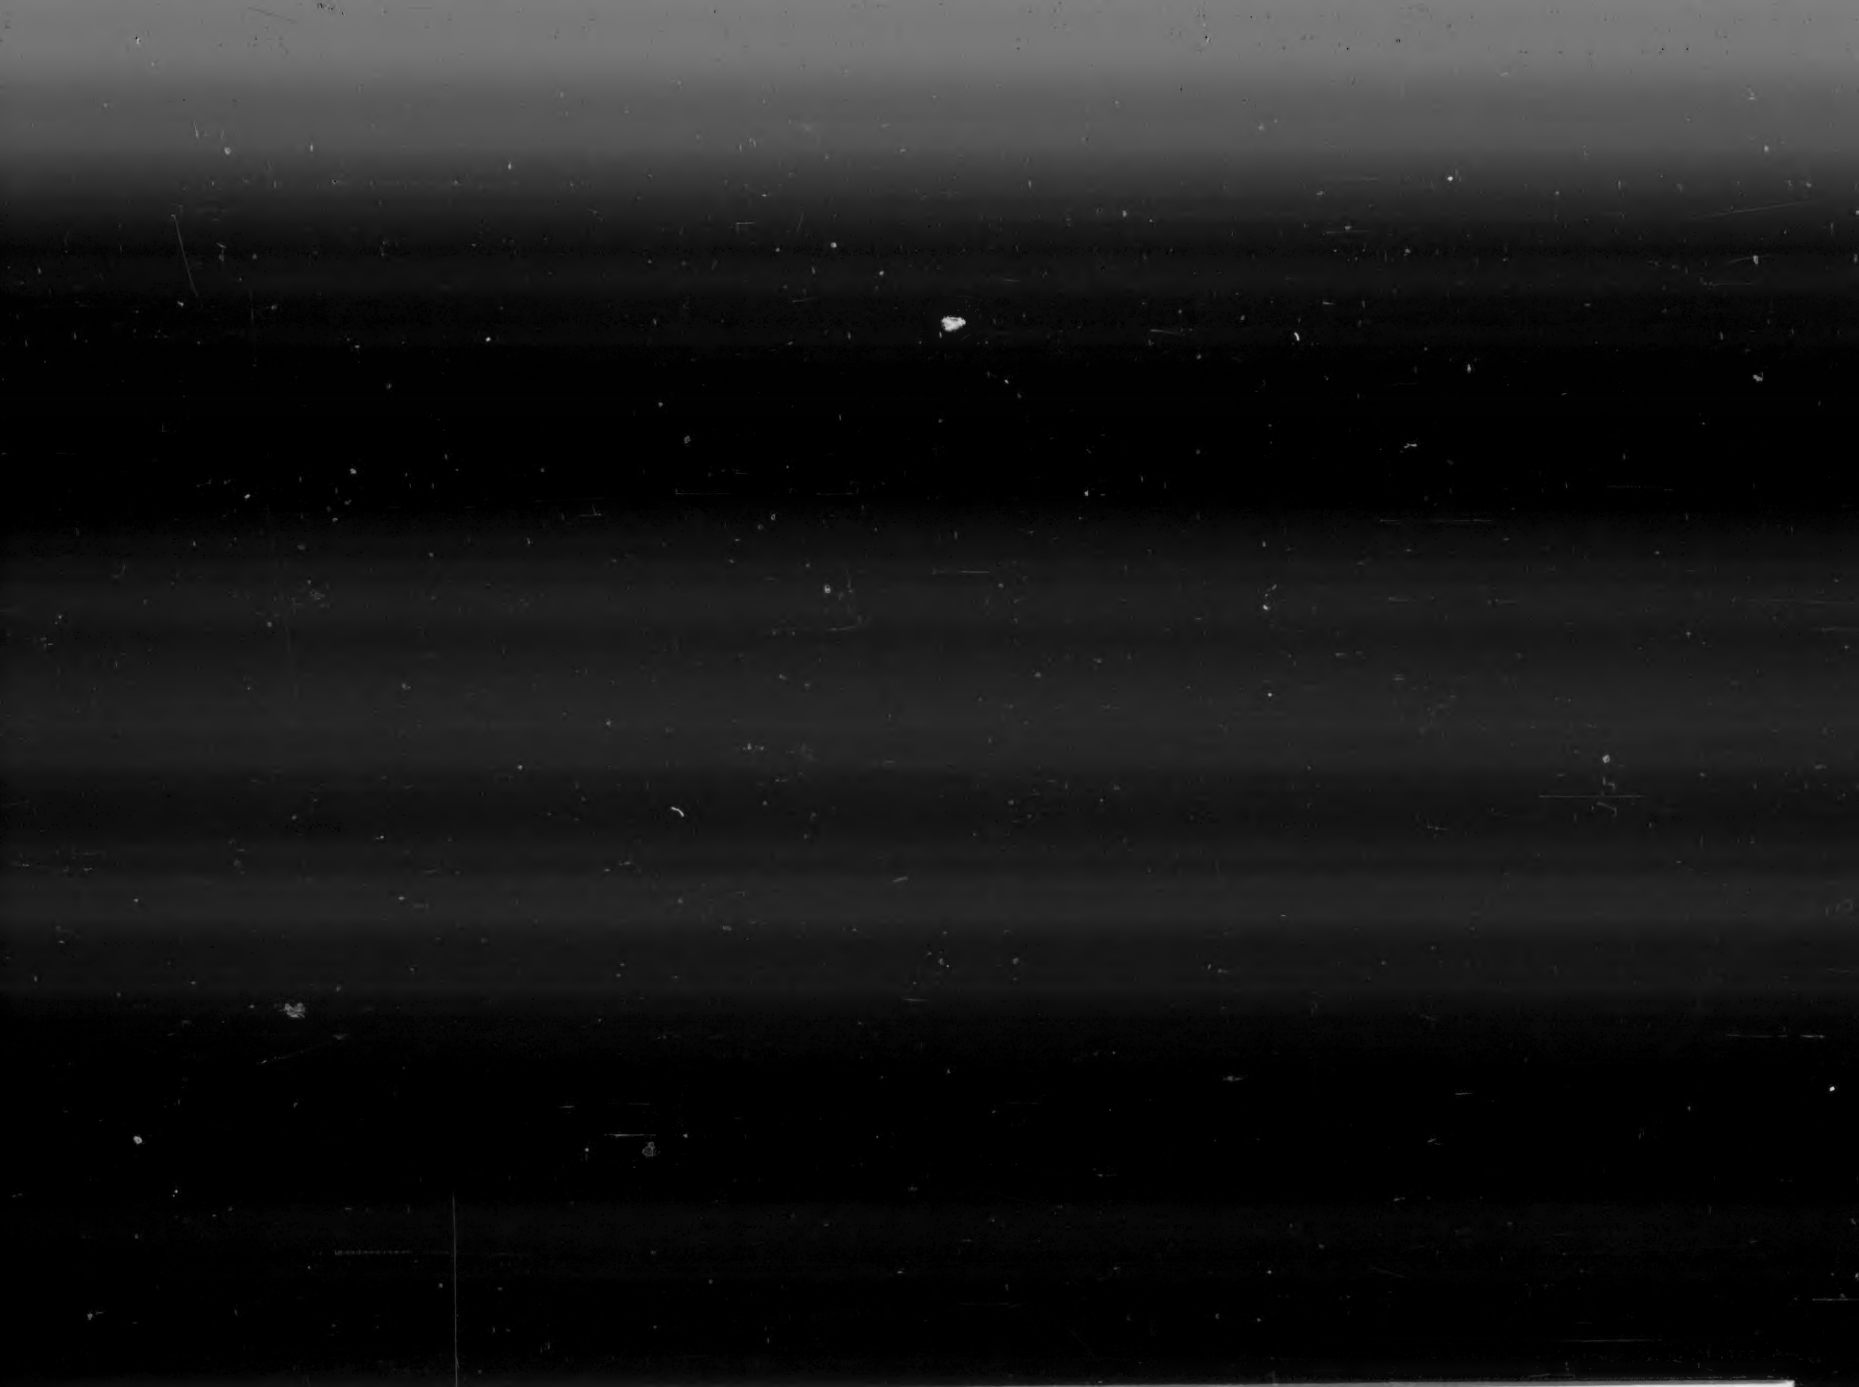
W

Water
low potential, osmotin molecular cloning, tobacco, 1096
relations, cadmium, expanding bean leaves, 1365
thermal transition and freezing injury, pea and soybean seeds, 1121
Water stress
leaf carbon isotope discrimination, C_4 grasses, 162
reduced accumulation of abscisic acid, molybdenum cofactor mutant, barley, 728
Wheat
activation of phosphoenolpyruvate carboxylases, glucose-6-phosphate, 648

anaerobic succinate-lactate production, cellular pH, 29
chilling in light, 1609
cytokinin oxidase, 899
enhancement of thermal injury, photosynthesis, high light intensity, 1041
germinating embryos, heat shock response, 598
heat shock protein synthesis, thermal tolerance, 140
photorespiratory rates, ^{18}O-labeling, 500
seed dormancy, responses to abscisic acid, 643
tall and dwarf genotypes, temperature effect, gibberellin responsiveness, 854
Wounding, putrescine-induced, ion transport processes, corn seedlings, 988

X

Xanthium strumarium
stomata closing with syringomycin, 1435
topography of photosynthesis, fluorescence imaging, 1233
whole plant and leaf, ethylene exposure, steady state gas exchange, 85
Xylose, -specific antiserum, glycoproteins, various plants, 1182
O-Xylosyltransferase, zeatin glycosylation enzymes, bean, *Phaseolus lunatus*, 1316

Z


Zea mays (*see* Corn)
Zeatin
conversion to dihydrozeatin, enzyme mediation, bean embryos, 1630
glycosylation enzymes, bean, *Phaseolus lunatus*, 1316
Zeaxanthin
high-energy-state quenching, sunflower, *Monstera deliciosa* and *Hedera helix*, 881
induction and relaxation kinetics, nonphotochemical quenching, various plants, 887
synthesis and energy dissipation, chilling temperatures, mangrove and soybean, 894
Zinnia, ^{13}C distribution, invertase and growth retardation, 316
Zucchini
plasma membranes, *b*-type cytochromes, 1077
red light-induced accumulation, ubiquitin-phytochrome conjugates, 380
